# AD-EL-ITE

TRADE MARK  
REGISTERED

Our Ad-el-ite Trade-mark is looming up larger month after month and its prefix to our Paint and Varnish Remover is meaning more to more people every day. It stands for the easiest, quickest and most effective way of taking off old, hard coats of paint, varnish, wax, shellac or enamel.

There is no use in your putting in all that time and hard work in the old-fashioned, time killing, back-breaking method. Here is a magical worker for you that never fails to bring satisfactory results. It has absolutely no objectionable features and is the best preparation for its purpose at present on the market.

Let one of our free samples decide the case for you.

# Help Yourself at our expense

## 3 Cans FREE

Tear or cut out the coupon in the lower right hand corner of this advertisement, fill it out and mail to us, and we will send you FREE prepaid two samples of Johnson's Wood Dye, any desired shades, and one sample of Johnson's Electric Solvo. We will also include a copy of our 48-page book, *"The Proper Treatment for Floors, Woodwork and Furniture."* It shows in true colors on wood the different shades of our Wood Dye and tells exactly how to apply any kind of a finish on new or old, hard or soft wood, how to remove old paint, varnish, shellac or any finish almost instantly from wood, metal or glass with Johnson's Electric Solvo. In short, it contains a fund of valuable information for ambitious painters and wood-finishers. Don't fail to send coupon today properly filled out.

### Johnson's Wood Finishes

*"The World's Standard."*

Johnson's Wood Dye, for the artistic coloring of all wood, is a preparation of unusual merit. It is a dye pure and simple. Don't confuse it with the many varnish stains which simply coats over the wood without dyeing the grain. Johnson's Dye does not raise the grain of the wood, but actually sinks in and colors it so that if this dye finish becomes marred or scratched, the natural color of the wood cannot be seen. It comes in all shades:

No. 126, Light Oak; No. 131, Brown Weathered Oak; No. 172, Flemish Oak; No. 140, Manilla Oak;  
No. 125, Mission Oak; No. 110, Bog Oak; No. 123, Dark Oak; No. 121, Moss Green;  
No. 178, Brown Flemish Oak; No. 130, Weathered Oak;  
No. 128, Light Mahogany; No. 129, Dark Mahogany.

Gallon cans, \$3.00; quart cans, 85 cents; pint cans, 50 cents; half pints, 30 cents.

Johnson's Electric Salvo instantly softens all old finish on wood, metal and glass so it may be easily removed with putty knife. It has no objectionable odor—does not raise the grain of wood, will not injure the hands and does not harm or change the color of the most delicate wood, or have any injurious effect on metal and glass. Fine for removing putty from windows and cleaning paint brushes. Gallon cans, \$2.50; quart cans, 75c; pint cans, 40c.

### Try At Our Expense

We want to give you an opportunity to prove for yourself at our expense, the truth of our claim about our wood-finishes. It is worth a great deal of money to you to know just which of the many is really the best.

You can find out, free, simply by sending coupon. Please be sure to give your paint dealer's name. Send coupon today—don't forget.

CHICAGO, DECEMBER, 1907

No. 12

## 1908—Leap Year—1908

1908 is Leap Year!

Leap Year is the year when the Julian Calendar makes up for lost time. It loses a quarter of a day every year—but makes up for it with an extra day—the 29th of February, every Leap Year.

Doubtless every Bosch Agent can look back over the past four years and see where he has lost at least a quarter of a day each year, through one cause or another—well—here's your chance to make it up—one whole extra day—and think how much can be accomplished in a day!

And this extra day will be happily located—right at the threshold of spring—the very beginning of the heavy building, moving, painting and decorating activities—so we are looking forward to that one extra day—February 29th—for some extra allotment of time. We may have more to say on this point in the January and February issues.

But to get back to the present—February 29th is a long way off—and we expect to accomplish a whole lot before then. This is December—the final opportunity of a glorious year—and the best way to give the New Year of 1908 a rousing good start for a record breaking run, is to put on full steam ahead right now and gather momentum by winding up 1907 in whirlwind fashion.

There is business to be had in December in the decorating line—lots of it—and our scouts and veterans will know without telling just where the fighting is and turn instinctively in that direction. They surely will overlook no opportunity of covering themselves with added glory. There has been sharp and strenuous jousting all along the line this year for the winner's laurels—the “knightly and gentle debate” still wages merrily, and it's going to be a mighty close guess

**PLEASE CUT THIS OFF  
WHEN YOU HAVE READ IT**

This list has been prepared not only for you, but for your customer, also, that the latter may select articles from it without learning what they cost you. The discount from everything in the list will be just ONE HALF the printed price. EXCEPT the following, which are net: Linseed Oil, Turpentine, Benzine, Rubbing Oil, Alcohol, Ammonia, Renowned Engine Oil, Atlantic Red Oil, Model Cylinder Oil, Extra Neatsfoot Oil and Extra No. 1 Lard Oil and White Lead, on page 88. \*No other exceptions to regular one-half the printed prices except when the article is marked net in the price columns. Wall Paper discounts are not quoted in the Bulletin, regular discount sheets for the Wall Paper line accompany the sample books.

just who will finally stand forth the victor on the field of 1907. But there is going to be an unusual number of heroes with halos shining brightly—that much is settled already, by the number of orders taken captive thus far in comparison with 1906.

#### THE INVINCIBLE BOSCH LINE.

The reason our noble army of Bosch Agents is so unconquerable in its ever forward march is that it presents every year an impregnable front—an invincible line of wall papers, schemes and suggestions that simply sweeps the whole field of decorative taste and fancy, and leaves not a break or a loophole for an order to slip through and escape.

The line for 1908, as you already know, from our editorial in the November issue of the Bulletin, has been unusually well widened and strengthened. And, by the way—if by any chance you didn't get last month's issue—ask us for a copy—and read carefully our comments on the new line—it will do you good.

"New" and "unusual" have come to be familiar words to most Bosch Agents, and, therefore, perhaps they are not strong enough to convey any adequate conception of the forwardness of our 1908 line of wall paper patterns, shades, tones, effects, novelties, and specialties.

Yet every year that we have used the words "new," "original," "unusual," etc., in describing our next year's line—you will agree that our performance has more than fulfilled our promises.

Believe us, then, when we assure you that this will be doubly true in the case of 1908. It would seem impossible to surpass our wonderful line of 1907, which has, in your able hands, worked such wonders in business boosting, and yet—the impossible has been accomplished.

While you have been busy in the selling field—we have redoubled our activities in the buying field, raking over this entire globe with a "fine tooth comb" in our determination to give the decorators and their customers a *real* surprise for once, in a sumptuous array of mural hangings and decorative attractions such as would lend new meaning and emphasis to the words "new" and "unusual."

When you get the Bosch Sample Book for 1908, you can just simply *forget all you ever knew* about wall paper patterns—open the book and revel to your heart's content in a new wall paper world.

Of course, all that is really good and popular in the old line, both in staple patterns and in novelties is retained—in fact, we have gone back into antiquity about a hundred years or more, to get *some* things that were *old enough* to be "faddish" and appeal to the ultra-artistic and exclusive tastes—the new Pictorial Wall Decorations are a good example of this: Hand-painted Scenic Paneling Effects that are simply going to take like wildfire in the better class of homes.

Then there are the remarkable novelties in Crown effects—and the

#### CUT-OUTS.

They're going to be "the big fuss" for 1908 and no mistake. And the new "Oatmeal Grounds" effect has to be seen to be adequately appreciated—the name fades when you see the delightfully rich effects on paper.

Don't forget that "Lin-o-wall" and "Santas" are still "on the job"—more pleasing than ever, and working overtime to keep pace with the orders. They're the good old reliables for service and wear.

Just take the whole category of descriptive words—"new"—"original"—"different"—"novel"—"chick"—"startling"—"rich"—

#### PLEASE CUT THIS OFF WHEN YOU HAVE READ IT

This list has been prepared not only for you, but for your customer, also, that the latter may select articles from it without learning what they cost you. The discount from everything in the list will be just ONE HALF the printed price, EXCEPT the following, which are net: Linseed Oil, Turpentine, Benzine, Rubbing Oil, Alcohol, Ammonia, Renowned Engine Oil, Atlantic Red Oil, Model Cylinder Oil, Extra Neatsfoot Oil and Extra No. 1 Lard Oil and White Lead, on page 33. No other exceptions to regular one-half the printed prices except when the article is marked net in the price columns. Wall Paper discounts are not quoted in the Bulletin, regular discount sheets for the Wall Paper line accompany the sample books.

"cheery"—"restful"—"striking"—"soft"—"harmonious"—etc., etc., etc.—put them all in for yourself, you can't put it too strong in describing the Bosch Wall Paper Line for 1908.

Now *believe this*—fill yourself up chock-full of it—believe in the line—the house—and, last, but not least, in *yourself*—accumulate a big reserve fund of joyous enthusiasm before New Year's Day—and nothing can stop you in your onward march to bigger business and larger profits than you ever made before in your life.

Remember, 1908 is Leap Year—you must progress by *leaps* and bounds.

Remember, too, Leap Year is when the fair sex may woo. Now *you* have been wooing the Goddess of Fortune long and ardently; with the attractions of the 1908 line in your hands, you will have to run pretty fast to get away from the Goddess of Fortune this time—she'll woo you with a vengeance on her own hook if you give her half a chance.

And remember, too, that our Decorating Department is here to serve you in any way that it can—with suggestions as to designs, color schemes, use of cut-outs, etc., in individual cases—without a penny of expense to the decorator who is handling the Bosch Line. Consult this department on occasion—use it freely and we will appreciate the extra opportunities you give us for co-operation.

*If you haven't, do! Get the Sample Books for 1908.*

And now, gentlemen of the Bosch Agencies

—for your spirited support, your loyalty and enthusiasm, your earnest work and your orders, in 1907—*we thank you.*

Prosperity—somewhat saner and better balanced—is still the order of the day—good crops—good business—plenty of money in the country—and *more* of it than usual retained in the hands of the individual who is the likely customer for painting and decorating—all these things, together with the new Bosch Line—point to big doings in the wall paper business in 1908; so it is from sound business judgment as well as from the bottom of our hearts, that we wish you, one and all, a Merry Xmas, and particularly a Happy and Prosperous New Year!

*Send for the 1908 Bosch Sample Books!*

HENRY BOSCH CO.

### SANITAS IN THE OFFICE.

Never before was there a time when men took more care with the appearance of the office.

It has come to be a positive fact that the impression created by an office on a visitor's mind is of great importance in a business way. The standard of office finishing and furnishing has been raised to a high level and the bright business or professional man knows that people have come to expect this standard maintained everywhere. An attractive office is a necessity.

The success of SANITAS as an office wall covering has been tremendous.

Its richness—its durability—its cleanliness—fit it especially for the purpose.

The fact that it is inexpensive is a great point in its favor, for with all its peculiar and splendid qualities one would naturally expect to find it high-priced.

If you are determined to let no business escape which rightfully belongs to you, do not miss a single office in your town.

More of the waking hours of the business man are spent in his office than anywhere else.

It is—or at least should be—next in his interests to his own home.

The appearance of the office has a great effect upon his own mind, while, as he very well knows, the more attractive their surroundings the more contented is his help, and the more effective work they will do.

There is little inspiration for any one in shabby, dingy walls.

SANITAS appeals to business men, for it is a straight business proposition.

Aside from all its attractiveness it brings returns in length of service far in excess of its cost.

With many people constantly visiting an office, bringing in dust and dirt from the street, it is no wonder that it soon comes to look dingy.

Well-painted walls can be washed for a while after a fashion, but the paint soon grows porous and holds the dust so that it cannot be removed. At no time does a bare painted wall look attractive to the visitor.

Contrast such an office with one where the walls are covered with SANITAS—which never fades, never grows porous, never cracks or peels off—from which dirt, dust, ink or any foreign matter can be wiped right off with a damp cloth!

There is every reason why SANITAS is best for the office.

There isn't one reason why it should not be there.

Call on the business men with your samples.

Offer to measure the walls and estimate the cost without placing him under the least obligation.

Appeal to his business judgment—his pride—his common sense—and you cannot fail to impress him with the undeniable fact that for all office walls there is nothing like SANITAS.

Turpentine may be tested for its purity by dropping a small quantity on a piece of white paper, and then exposing to the air. If the turpentine is pure, no traces will be left, but if oil or other foreign matter is present, the paper will be greasy or soiled.

CUT OUT, FILL IN AND MAIL TO US THIS OR THE PRECEDING BLANK IF YOU WISH TO HAVE OUR WALL PAPER AGENCY.

**POINTS FOR THE PAPERHANGER**

BY A. A. K.

If you have your doubts about the wall, add a little Venice turpentine to your paste.

If the wall is very hard, add molasses or brown sugar to the paste, to make it more flexible or less liable to dry off.

If the wall is hard do not use alum in your paste, for that would make the paste too hard and liable to come off.

Alum is good in some cases, in moderate quantity, say two ounces to four pounds of flour. Use the clear crystal alum, as it is not so strong as the other sort. Alum will injure papers that have metallics in their printing.

To paper over kalsomined walls, glue size is good, and where the stuff is old and dry it is well to make the size penetrate the material so as to bind it together and to the wall surface. Apply the size hot, especially where the walls are cold, otherwise the size will jell before it penetrates deep enough.

For the rough wall make your paste quite stout; for a hard and smooth wall make it thin.

Thin paper, thin paste; heavy paper, heavy paste, the rule.

For pressed papers a good paste is made as follows: Mix two pounds of flour with warm water to a batter or thick cream, then add an ounce of powdered crystal alum, a little pulverized rosin, and one-half ounce powdered sugar of lead; add boiling water and stir until the paste is cooked.

The painted wall must have its surface cut with sal soda water first, to roughen the surface; put no alum in the paste, but put in some Venice turpentine, and if this is not at hand, use a little syrup or brown sugar instead, or size the wall first with Sisk's Patent Size.

If you pour in more boiling water than just enough to bring the batter to a very thick condition you will have watery paste. Too much hot water and too much cooking make thin, weak paste, one that will not hang on.

It is the aim of a good paperhanger to so paper a wall or ceiling that it will present an apparently solid and unbroken surface without sign of creases or joinings or smears. The workman who can do this may be allowed to pat himself on the back. And not only should the paper look solid, but it should be pasted so well and with such excellent paste that it will stick to the wall and not loosen or wrinkle. Good work can only be done by a good workman and good tools, good paste and properly prepared walls.

Here is a way to test a straight edge, and a good one: Take the straight edge and lay it flat on a board or piece of paper, hold it firmly and draw a line from end to end with a sharp lead pencil (Dixon's are the best), pressed close against the edge, then turn the straight edge over, thus bringing the same edge up to the line on the opposite side and repeat the operation. If one line covers the other the entire length your straight edge is true; if not, wherever the lines fail to cover will show you where the imperfections are, and you can mark them on your straight edge and correct them. Of course a straight edge out of line is no good until corrected.

Good, sound walls may be made from the most unpromising ones with a little know-how and care. I believe in sizing all walls, old and new, hot or cold, hard or soft. Ordinary walls need only the usual glue size. If there is kalsomine on the walls use Sisk's Patent Sizing, and you won't have to remove the old stuff, no matter if there is a foot of it there. The same with whitewashed walls. If the walls are bad, with loose scale and such, better scrape this off and size with the Sisk Size. If you have a varnished wall to paper over, use the Sisk Size, and it will hold the new paper. This will save you a lot of trouble in such a case, for paper won't stick to varnished surfaces unless something is done to make it stick.

For knife cutting, have a plain pine top paper board, without varnish or other finish, but for the rotary you must have the zinc strip. I advise a light and strong and compact table or board for pasting and cutting on, a very good one that I have seen weighing only sixteen pounds, and when not in use was placed in a box ten inches wide, six feet long and three inches deep. Open, it is twenty inches wide, and there are rods attached so that an extra leaf may be used, for use in handling wide papers.

---

It is economy to use the best grade of glue for sizing walls, for it will go twice as far as common glue and do better work.

---

The seam roller made of celluloid is better than the one of wood, covered with cloth. Use a 10-inch drawn bristle smoothing brush for papers not apt to be injured by the bristles. For delicate papers use the roller.

---

A paper cutting knife should be a well tempered one. When you have occasion to sharpen the knife try to preserve its original shape. A strip of emery paper fastened to a straight edge with paste is a good thing to sharpen the knife on while cutting paper.

---

The wheel or rotary cutter is quicker than the knife, as there is no time lost in whetting the blade. Such trimmers are used in connection with a straight edge with a groove in it, and in which the rotary slides, a strip of zinc being fastened to the pasting table for the cutter to cut on. A well tempered rotary blade will last a long time without sharpening if the blade is well tempered. I have known them to be in use a whole year without needing sharpening.

---

Don't put too much alum in your paste, as it makes the paste hard and brittle, and often causes the paper to crack. A small tablespoonful of pulverized alum to the bucket of paste is sufficient, and when there is bronze in the paper use no alum at all, as it will discolor the

## MARKETS

---

While business is now very quiet for various reasons, there is no good ground for anticipating a dull year in 1908. The country is very prosperous and will demand the usual amount of paint unless some now unforeseen disaster befalls. The present slackening up of activity is a healthy sign. It means that the country is taking a much-needed rest from the fever of speculation and enterprise that has outstripped our monetary resources. When this holiday is over and the money market becomes easier, business will be resumed on a more cautious scale. The paint trade will not suffer in the long run.

---

## MIXED PAINTS

---

A decline in sales is to be expected at this season of the year, but this decline is not beyond the normal nor has it markedly affected prices. There is plenty of work ahead, and with the close of the winter and a sane view of the resources of the country generally, spring trade may be expected to reach a satisfactory volume.

---

## COLORS, DRY AND IN OIL, AND VARNISHES

---

Quiet; no change in quotations, nor do we anticipate such, as stocks are low throughout the country.

---

## WHITE LEAD

---

Market firm at previous prices; business of fair volume for late fall trade.

---

## LINSEED OIL

---

Shows an advance; this caused by the fact that the seed market holds but small reserve.

---

## TURPENTINE

---

A decline of 6 cents from last month's quotations; frequent fluctuations would indicate a speculative origin.

---

## BENZINE

---

Unchanged.

# DECORATORS!

---

# ATTENTION!

---

An epidemic of Minor Theaters is sweeping over the entire country and the decoration of these rooms mean good profit for the man who is "ON THE SPOT."

Under various names, **NICKELORUM, THEATORUM**, etc., making a specialty of moving pictures, light vaudeville and other inexpensive attractions, with a nickel entrance fee, these places of popular amusement will soon be numbered by the hundreds—with a representation in every town in the land.

**BE ON THE ALERT** and when the time comes talk **PLATE No. 1** (your book of Home Decoration).

The **SCENIC VIEW** with **POMPEIAN PANELS** alternating is specially appropriate, and nothing one-half as effective can be secured by a far greater outlay of money.

Plate No. 1 need not be strictly followed out. Panels of two, three or more scenes—can be introduced, or, if economy has to be considered, the panels can be more widely separated: in fact there is no limit to the number of variations possible.

Our Decorative Department is kept busy planning and filling orders for this class of work, and although we carry a collection of Scenic Views fully equal to the combined stocks of all other houses, the demand has rendered necessary a special cable to France for immediate and increased supplies.

Send us measurements of room, show size and location of openings, give approximate amount of money your customer is willing to pay—at list price, and we will forward plans specially drawn to scale, together with samples of material. This service is rendered entirely free of charge.

— Address Decorative Department —

Chicago ————— New York

paper. In fact, it is only necessary to use the alum in very hot weather or when using soft paper, where the color is apt to run.

The hardening and settling of a mixed paint in a can in a comparatively short time subsequent to its manufacture is the direct result of an inferior drier. Rosin drier, improperly prepared, will produce disastrous results in every instance. Subjected to an adequate test, the defect, or defects, are revealed and the product promptly rejected.

It is said that kalsomine may be rendered hard enough to bear washing by adding to it a small portion of potassium bichromate. This is said to render the kalsomine insoluble. We do not know the exact quantity of bichromate to use, but careful experimenting will soon determine the amount.

### A FEW FOR THE CARRIAGE PAINTER

Too much oil used in colors will cause varnish to lose its gloss quicker than anything else.

If your quick flake white doesn't work satisfactorily, just try a few drops of rubbing varnish in it.

When laying out a gold scroll on a fine job, don't let your design be influenced by a desire to save gold. Nothing produces such a "cheap John" effect as a thin, scrawly scroll. A fine scroll is a joy to the beholder, and of it may be said, with truth, that if it's worth doing at all, it's worth doing well.

No striper should neglect trying the brass-bound "camel's hair" sword stripers. Their superiority to the long-haired "cat's tail" variety of striper is so great that we have yet to meet the man who, after giving them a fair trial, returned to the use of the old style pencil. They are especially useful to the coach striper, being just the right length, and combining the strength of the sable with the softness and "cling" of the camel's hair. For all but the heaviest colors they are the pencil *par excellence*.

### LETTERING ON WIRE GAUZE

For painting wire gauze, lay the gauze on a flat table, and with a large stencil or other square ended brush pounce the color on sparingly, not with up and down strokes, which fill the meshes. The color, which must be thin, is mixed with turps, driers and boiled oil; two coats are required. To dry, suspend the blind. Color made with turps and a little gold size is also recommended. Any space to be gilded should be filled up with dry white lead, mixed with gold size and turps. A little dry whiting dusted on the gauze will prevent the gold leaf sticking. For writing on wire blinds, so as to get clear, sharp-edged letters, the paint used should be mixed very thick, and should possess good covering properties. The paint is generally mixed with equal parts of gold size, turpentine and boiled oil, and should be applied very sparingly, otherwise it will run down the wire. Some workers use a mixture of weak glue and whiting for filling it. A simple and reliable way is to paste stiff paper on the back of the wire; when the letters have thoroughly dried the paper may be easily removed by moistening with warm water. Flat lining brushes are generally used for this purpose. Lines, corners and writing would all be arranged as in ordinary work of the kind. For the corners it is better to have a stencil, as by this means the corners can be done cleaner and quicker. If it is desired to do away with the traces of the wire, so that the work will be left smooth, it will be necessary to go over the lettering several times with the filling-in medium. The raised effect of gold letters in relief is obtained by gesso treatment, generally with the aid of stencil plates, cut from millboards. Alabastine would probably be the safest material for the beginner to use, although the relief may be produced by a mixture of plaster of paris and weak size. Of course, the surface must be rubbed down and prepared in the usual manner with gold size before gilding. Another method of obtaining letters in high relief is to make two-thirds whiting and one-third white lead and

nix to the consistency of varnish. This may be thinned with turpentine for use. Another way is to add 1½ ounces of alum to a pint of water. Thin plaster of paris with this medium and apply. When dry, glue-size the letters before gold-sizing them. The latter way will require considerable dexterity.

### ANCIENT GLASS WINDOWS

Glass is about 5,000 years old. Specimens have been found in the Egyptian tombs about 4,000 years old, and glass bottles are represented on tombs about 1,500 years earlier. All the ancient glass was practically useless for transmitting the rays of light unbroken and with undiminished energy. Glass mirrors are mentioned by Pliny, but as they were not perfectly plane they gave back a most imperfect image and were not in high esteem. Mirrors were made in Egypt thousands of years before the Christian era. The materials used were obsidian, metal, zinc and silver. Window glass was slow to gain currency, as is evident by the little panes in many old buildings of Europe. They usually are round or nearly so, and so small that one of them can easily be held between the tips of the fingers and thumb. That this form of window glass first came into vogue in Germany is evident from the name, Scheibe, meaning disk, by which a pane of glass is still designated, no matter what its shape.

In getting up the ground for all veined marbles, which, as a rule, are all of a light color, it is important that a good body of white should be laid on the work, because all the colors put on afterwards in the process of marbling will be purer, more transparent and will keep their color better than on any other ground.

To make a terra cotta color paint use twice as much French ochre as Venetian red, by weight, and for a terra cotta tint add one pound of burnt sienna to five pounds of white lead.

### GLASS BRICKS

The demand for hollow bricks and building blocks for house construction has induced glass manufacturers to put hollow glass bricks on the market, and they promise to be used extensively for novel and artistic effects. The first glass bricks, being solid, proved a failure on account of their cost, but the hollow glass blocks can be made at much less expense. They are lighter and stronger than clay bricks, and are such excellent non-conductors that walls built of them are proof against dampness, sound, heat and cold. The bricks are sealed hermetically when hot, and are placed in walls with a colorless mortar made of special glass. The bonding strength of the glass mortar is almost as great as the bricks themselves.

### 1908

If you have not yet sent in your application for an agency for Henry Bosch Co.'s sample books for 1908, it would be well to delay no longer.

A large number of extra sets were made up for the season of 1907, but fall trade found us without any reserve whatever and many applicants were disappointed in consequence.

The agency for Henry Bosch Co.'s wall paper and decorative specialties places its holder ahead of all competition. Further, it secures an active co-operation of the house in all matter pertaining to interior or exterior decoration.

A post card is inserted in this copy. Fill out and mail it. Samples and a great variety of selling helps will reach you early in January.

White coach japan does very well in interior white paint, in place of patent drier or sugar of lead, if the finish is not to be flat; in the latter case use sugar of lead drier.

## COLORS FOR HOUSE PAINTING

The effect of a house may be improved or marred by the choice of the colors for painting it. There is no doubt that the old New England houses, with their white paint and green blinds, presented a very charming appearance, when seen amid the beautiful elms of the quiet village streets, and, indeed, a white house almost always looks well when surrounded by considerable foliage. On the other hand, a white house becomes very glaring when it stands out in the open, with the bright sky as a background.

This shows at once, says Edward Hurst Brown in an article on "Painting," in the *American Carpenter and Builder*, the necessity of making the colors harmonize or fit in with the surroundings, hence no general rule for color selection can be given. The idea that one color or one class of colors should be chosen because it is fashionable or the prevailing mode is for this reason rather an absurd one. In general, it may be said that dark colors should be selected only for a large house that stands out in the open, while lighter colors or tints should be chosen for houses that stand among trees or which are not over large. A house looks larger when painted in light colors than when dark colors are used. This is a point that should always be remembered, for most persons experience a keen feeling of disappointment if their house appears small, while if it can be made to look larger than it is, they are more than satisfied.

Books of gold leaf, writes A. Ashmun Kelley, should never be subjected to dampness, and it is best to warm the same before using, as then the leaves will detach from the paper more readily. Pale gold leaf does not stand outside exposure as well as the darker.

Too many men are unable to recognize their obligations when they meet them.

No, Alonzo, a bee isn't necessarily angry when it stings, but the victim is.

## READY FOR THE JOB

In commencing a job one of the first things to be considered is what tools are necessary. What length swings, falls, ladders, steps, etc., will be required, for it is not a good plan to cart a lot of things that will not be needed, but perhaps lost. Neither is there much gain derived from having to go to the shop a dozen times for things which should have been taken in the first place. I have found it a good plan when we have more than one set of falls, to use those whose lengths come nearest to the height of the building in which they are to be used. Not only do we save the extra weight, but we will find that the tail end of the fall is worn out more by dragging on the ground than when in actual use. With each set of falls I would recommend a separate set of roof lines, and that they be kept with them, thus guarding against their being lost, as well as having to hunt around for them when they are needed.

One of the things in painting a building that takes time, and if not thoroughly done is sure to cause trouble in the end, is the removing of the rosin from the joints of the tin work. The old method is a tiresome one, and has never been satisfactory. For accomplishing rapid work use a stiff wire brush with an adjustable handle.

In painting piazza cornices or other low stretches, it is customary to hang the falls from the main cornice and let them chafe against that of the piazza. The method needs no comment, the danger and folly are too plain. As a substitute and a remedy, I have found a drop rope with hooks to be of the greatest value in doing such work. (Simple arrangement of a drop rope with hooks at the end which could be hung from the piazza gable, and moved at pleasure with ease.)

The subject of step ladders is one we think we have given too little attention, if, indeed, any at all. How often do we use our ordinary 6 or 7 foot step to reach a piece of work 7 or 8 feet high when a 3 or 4 foot one would answer the purpose much better, and be not

quite so heavy to carry. I have found it a good plan to have them in sets of each height, as many sets as we may need, lettered and numbered, so we may be able to keep track of them.

In these days of progress, when a good deal of work must be accomplished for a very little remuneration, it is time well spent in considering what kinds of tools are the best to use to enable us to do the largest amount of work in the shortest period of time.

—O—  
WILLIAM ADDAMAN.

### TREATING GALVANIZED IRON

To prepare galvanized iron for painting, give it a wash made as follows: To one gallon of water add two ounces of each of these chemicals: Chloride of copper, nitrate of copper, and sal ammoniac; pulverize and stir into the water. Then add two ounces of muriatic acid. Stir until these ingredients are dissolved. Coat the zinc with this wash; the metal will turn black, but soon afterwards turn a grey color, and in a day or two the metal may be painted. The first coat of paint should be rather flat, as oily paint does not adhere well to metals.

—O—  
Staircases, if cold in their aspect, may have their walls treated very effectively in reds; if having much sun, a cool shade of peacock blue or neutral green is very suitable. In the designs large patterns may be advantageously employed, for they give an air of spaciousness; the decorator will not err should he render these patterns in rich tones.

—O—  
Positive colors are not suitable to an apartment, for to have a good effect, however skillfully combined and balanced, they should be seen at a greater distance than it allows. In lofty buildings, large halls and other interiors of extensive proportions, pure blues, reds and yellows may be used with advantage and even exclusively, showing, as they will, every line, and increasing the apparent height and length of the structure.

### BUSINESS HINTS FOR WIDEAWAKE PAINTERS

*Character of the Work the Measure of Value*  
—Show Cards Bulletin Signs—  
*Advertising.*

"It is not the cost of manufacture which determines the selling price of a wall paper," said a well-known manufacturer to the writer during the recent wall paper show in New York. "Two different patterns may cost the manufacturer exactly the same price to make, yet he can readily sell one for twice as much as the other. It costs as much to make a commonplace, every-day design as it does to make a novel and artistic paper with a character and an individuality that will appeal to the high class consumer. The first comes in competition with the 'bread and butter' patterns of every other manufacturer, and must be sold at a slight margin of profit to meet that competition. The second stands in a class by itself. The purchaser has nothing else to compare it with but buys it because its novelty or artistic merit appeals to him—or perhaps one should say to her, since the women usually select the wall paper. The value is not measured by the actual cost of production but by the brains that have gone into the design and which give it the special merit that it possesses."

This is a fact which we have spoken of more than once, yet it seems difficult to make a good many painters and decorators realize that, if they are in love with their business from an artistic standpoint, and have the ability to do original work—or what will pass for original work in their own locality—there is no reason why their profits on a decorative job should be limited to one hundred per cent. It is largely a question of the nerve that is required to ask high prices. The bare cost of materials and labor, added to the proportion of the running expenses of the business with which every piece of work you do should properly be loaded, is no criterion whatever of the value of the work. Your brains and

# A Floor Finish Proposition

Many homes have floors that should be finished or refinished—painted, stained, varnished or waxed. There is a big demand for high quality floor finishes—products that will do satisfactory work and produce pleasing and lasting results. We have a line of floor finishes that bring trade and hold it. They satisfy every demand in floor finishing.

## ***SHERWIN-WILLIAMS FLOOR FINISHES***

include the right product for every floor—Mar-not, a durable floor varnish; Floorlac, a stain and varnish combined; S-W. Inside Floor Paint, a paint that will stand hard wear and scrubbing; S-W. Porch Floor Paint, a paint that will bear exposure; S-W. Floor Wax, for waxed effects; S-W. Crack and Seam Filler, for unsightly cracks.

This combination of products is bound to get business. Write us about it. We have a proposition that will increase your sales and bring you profits. You can get the floor finish business for your locality.

SALES OFFICES AND WAREHOUSES IN PRINCIPAL CITIES

your ability are what make it an artistic piece of decoration—if it really is one or can be made to pass with your customers as such—and you are entitled to fair returns on your ability, the same as any other professional man. The playwright who produces a successful play expects to get a good deal more from it than a profit on the paper and ink and day wages for his time. The artist does not measure the value of a portrait or a landscape by the cost of the canvas and the paint, nor does the physician value his services by the actual amount of time spent. It is well recognized in professions like these that the long years of preparation required to perfect a man in his profession, and the genius and ability which he possesses, have given a value to his services far in excess of any measurement by time and materials. Decoration, in its highest sense, is no less a profession than art, medicine or architecture, and the leading decorators in the large cities have long ago recognized this and charge prices for the work which they do that will give them an adequate return for their ability and for the individuality which they show in their work.

The man who is content to go out and paint fences and barns and who takes contracts for house painting at figures which scarcely yield him more than journeymen's wages after all the expenses of his business are paid, is the man who complains most that there is no money in the painting business. There never will be if he is content to go along in the same fashion—if his only idea is to cut his prices to the bottom notch because he believes that everybody is engaged in a mad search for cheapness—if he is willing to take work for less than its real worth, rather than see some one else get it at a price that would bring a fair profit.

There are enough people in the country who want good painting done and who are looking for individuality and artistic merit, when it comes to paper hanging and decoration, and who are willing to pay a fair price if they can be made to believe they are getting an

adequate return, to make it profitable to cater for this class of trade, and to abandon all attempts to get the work where cheapness is the only thing the property owner seeks. The two classes of work will always be before us. No man can successfully run both a cheap shop and a high class one, and while the volume of work done and the number of men employed may not be so great in running a high class shop, the opportunities for profit are much greater.

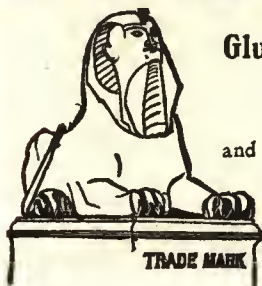

Remember, we say opportunities. A man may have all the opportunities in the world, but if he fails to use them properly he cannot hope for success. The decorator may cater only for the highest class of work in his neighborhood, but if he lacks the nerve and the self confidence to charge high prices he is simply throwing away his opportunities. Never forget that you are better off doing nothing at all than doing work at a loss. It is a good rule never to figure how close you can do a job, but rather to study how much profit you can get out of it. If you find that you please a customer by suggesting some novel and original scheme of decoration, talk first about the beauty of the idea, and how much it will add to her house. Make her believe you are only working along her own suggestions and endeavoring to express her individuality in her home. Then after you have her sufficiently well in hand, and she begins to talk price, don't spoil the effect at once by quoting prices for the paper by the roll and by figuring the work down to the lowest notch. Tell her, on the other hand, that you will measure her room and give her a price for the complete work. Find out, by using tact, just about how much she is willing to pay—it is well to do this early in the game—and make your estimate accordingly, giving value in the original and artistic character of the work. You can do this even when comparatively inexpensive materials are used for its actual execution. But you cannot do it—you can't expect to get good prices for your work unless you let your clients see that you

**HENRY BOSCH CO.**

New York Chicago

"WIPE OFF  
THE DIRT"

are giving valuable personal service; that you are putting thought and skill into the preparation of a scheme of decoration that shall be original, artistic and expressive of the character of the house. You may object, perhaps, that you have not the artistic training to undertake this; that you are only an ordinary painter and paper hanger and do not pretend to unusual decorative excellence. Nevertheless you can cultivate the ability that is within you until you can at least lead the decorative thought in your own town. You can study the articles on decorative paper hanging which are published in each issue of the trade magazines. They will give you many suggestions that may be new to you and which certainly will prove helpful. You can study carefully the different wall paper sample books, and look over each paper for the possibilities of individuality in treatment that it may offer. One, for example, can be used effectively as a cut-out frieze. Another can be employed as a filler for panels. One is adapted for a colonial house, another for use with mission

furniture. Gather together a practical working library—buying books that will make you familiar with the different period styles, so that you will not make the mistake of suggesting an empire wall paper to be used in a Louis XV drawing room, or a Dutch or German renaissance paper where a rococo or baroque pattern should be more appropriately used. Make yourself familiar with the different decorative fabrics, such as burlaps, crashes, denims and buckrams, and learn their possibilities. Experiment with them. Read the decorative articles in the popular periodicals. They are often impractical enough; generally written by women or hack writers who know nothing from a practical standpoint about the work of the decorator, but who glibly write a lot of decorative “patter” that goes with the multitude. But you want to familiarize yourself with what they say and try to reduce it to some practical common sense meaning.

—*Painters' Magazine.*

(To be concluded in January issue.)

## GRECIAN DECORATION

### FOR CHURCHES, HALLS OR OTHER PUBLIC BUILDINGS

(SEE PAGE 19)

The complete decoration is shown upon page 19, but this arrangement can be greatly varied.

For example: If the room to be decorated should be 12 feet or over in height and a simple treatment desired, the wide cornice border could be used at top of wall, as shown in plate, and the columns, with their Caps and Bases, brought directly up to it, omitting all else.

For a room less than 12 feet in height the narrower cornice border could be substituted for the wider.

The full decoration calls for a height of not less than 16 feet, and, if preferred, the arch and scroll could be used upon alternate panels or only over doors and at pulpit or rostrum end of room, but the most approved method of use is that shown in our illustration.

A room 14 feet high would be very effectively treated by the use of Columns and Arches up to about 13½ feet, the wide cornice border being omitted and a narrow moulding of appropriate color substituted therefor at angle of wall and ceiling.

For backgrounds plain tints, printed duplex, or figured paper can be used.

**The Wide Cornice** is supplied shaded either to the right or to the left, and when used all around the room should be ordered with the left shading for one end and one side, and the right shading for the other end and side of the room.

**The Narrow Cornice** is supplied shaded either to the right or to the left, and it is of no consequence which shading is sent when an arch treatment is ordered.

**The Column** is printed one way only and is matched to the caps and bases by reversing the shading of one column when hanging on the wall, bringing the dark shades towards the center of the arch on both sides.

**The Caps and Bases** used around the room should be ordered shaded left for use under cornice with left shading and shaded right for use under cornice with right shading.

**The Arch and the Scroll** are both shaded direct, and no mistake can be made when ordering.

**How to put up the Arch.**—First decide the height you wish the columns (including caps and bases) to be, lay out the sections of the arch on table or floor to find the exact width it will occupy, strike chalk lines for your columns and above them chalk arch line showing sweep of the arch. Then put on your hack ground between columns and the back ground between arch, cornice and scroll. Then your columns and cornice, next the arch sections, then caps and bases, and lastly the scroll within the arch. Your wall should be clean and if not papered give it a coat of glue size to insure that your work will not loosen or peel off.

**To Strike Line to Hang Arch by.**—Drive a nail through a lath and into wall at center of line where top of cornice will be. Insert a pencil through other end of lath at half the inside diameter of arch and you get a true half circle easier than in any other way.

Working plans supplied, gratis, by our decorative department upon receipt of details.

**For terms and other information see page 3.**

Containing many valuable recipes and general information in the various branches of the trade. 96 pages, paper....\$0.80

**Tex-Ta-Dor-Na Burlaps.**

Our burlaps are made from the finest quality of specially woven burlap. We can strongly recommend them for all purposes they are so well intended to serve as important aids to permanent interior decorative work.

You will note the distinctive feature connected with Tex-Ta-Dor-Na goods. In that they have an entirely different "stiffening or backing" from any other make, giving them many advantages over all other textile wall-hangings.

It renders the fabric more easily applied to the wall surfaces than goods made by any other process and less liable to draw from the wall or pull off plaster.

This "backing" used exclusively on Tex-Ta-Dor-Na goods is a specially prepared fibre pulp, producing a surface or lining similar to the nature of wall paper stock. It is self-evident that a "backing" of this kind, of so pliable and flexible nature, has advantages that preparations, or backings, made up of hard clay filling, glue, dextrine, etc., cannot have.

Made in three qualities, Dyed, Filled and Sized. Quotations follow. Sample books and instructions how to hang free on application.

**Full Roll Prices can not be given on less than Full Roll Orders.**

**Sized Burlaps.**

Put up in rolls of 50 yards, 36 inches wide.

	Per yard
Full roll lots, 36 inches wide.....	\$0.29

# Window Shade Department.

The shade business is becoming of greater importance to the decorator every day, as he is constantly being called upon to replace old shades with a new and better grade.

The demand for better laces and insertions has caused us to carry a much larger line than formerly, a few of which are shown in this issue.

When decorating a house don't forget to mention that you can furnish any kind of window shade with a variety of trimming at a very low price. Special prices for large orders of Victor, Duplex or Bancroft's Hollands submitted upon request.

## To Avoid Errors and Delays

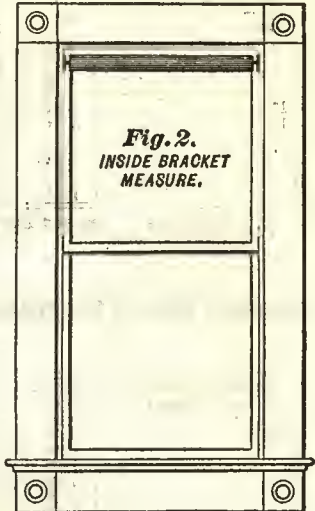

in made to order shades, we show two different ways of hanging same, and request measurements to be given from bracket to bracket, that is, where bracket is to be placed—measure each window separately.

When shades are to be hung as shown in Fig. 1, on outside or surface of casing, give exact distance from point to point where bracket is to be placed. State "outside bracket measure" on your order.

When shades are to be hung as shown in Fig. 2, on inside or in the box of casing, give measure from jamb to jamb exact, make no allowance—we make proper allowance for working of roller. State "inside bracket measure" on your order. For length of shades give measure from where bracket is to be placed to sill.

We recommend the use of Victor Hand Made Oil Opaque wherever a durable and handsome window shade is desired. They will not fade, wrinkle nor shrink. They are colored with the best of pigments and linseed oil.

Price per yard of Victor Hand Made Opaque Shade Cloth, in full pieces and less than full pieces.

Width in inches	38	42	45	48	54	63	72	81	90	102	114	120	150

See Pages 26 to 28 for Fringes, Laces and Insertions.

Sizes in schedule are for shades when finished, mounted, ready to hang. In ordering, always send measurements according to instructions on page 23. Shades longer than "even feet" measurements must be figured at next longer length.

For prices on fringes and insertion with fringes for above, see pages 26 to 28.

Always order color desired by number. Please do not cut sample books.

Lettering in shaded gold leaf letters, \$1.00 per running foot. In gilt, 50 cents per running foot.

SAMPLE BOOKS of Victor oil opaque and Sun Fast Holland sent on application.

SPECIAL NOTICE.—Buyers please notice that the shades listed above are made of the best cloth and roller obtainable therefore please do not confound this quality with shades listed on pages 26 to 28.

Always state, when ordering shades, whether inside or outside brackets are desired.

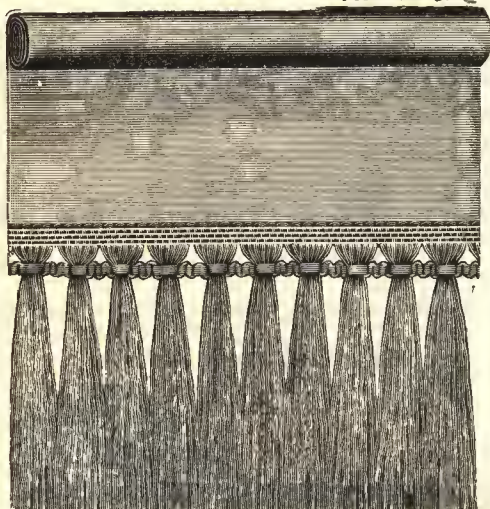

Estimates furnished on large orders for any of the above shades.

**For terms and other information see page 3.**

## Our Paint Department

There can be no better guarantee offered you than that our own practical experience in the use of Paints, Colors, etc., guides us in selecting the large and complete stock we carry. Read the PRICE CURRENT pages of this department and you can readily make time and money-saving selections of goods you require in this line.

### Henry Bosch Co.'s Prepared Paint

Best Paint Made.

This new brand recently added to our line of mixed paints, is absolutely the **BEST PAINT MADE** in every feature that can be incorporated in the make-up of an "always ready for use" Mixed Paint. It has at once taken the highest possible rank with the trade, and earned for itself the best encomiums, as being all we claim for it. Only the purest pigments of lead and zinc, the best linseed oil and the highest grades of Japan dryer enter into its make-up. These combined materials make a most durable and elastic body, and when applied as directed, will never rub, peel or crack off. One gallon of this high grade mixed paint will cover (two coats) 300 square feet of suitable surface, and make a well finished job at so light a cost that its shown excellence and economy will still further promote its use whenever opportunity offers. Our sample card showing 36 beautiful shades of this line will be promptly mailed free, when asked for.

### Storm-Proof Ready-Mixed House Paint.

Ready for Use.

We offer and recommend our Storm-Proof Paint for all classes of work for either exterior or interior use. It has stood the test of all climates, and will easily wear as long as ordinary lead and oil paint. For quality and price there is nothing better made. The goods are combined with pure white lead, linseed oil and other ingredients. Where applied according to directions will always give the very best of results. One gallon of Storm-Proof Ready Mixed House Paint will cover from 250 to 300 square feet to ordinary smooth surface two coats, and produce results at a low cost that will last for several years. Our sample card embracing 36 of the latest and most popular shades, showing suitable combinations, will be promptly mailed on application.

## Henry Bosch Co.'s Enamel-ite.

A varnish paint for large surfaces such as inside walls, ceilings and inside woodwork where a high glossy finish is desired.

Apply Enamel-ite as it comes from the can, using a soft bristle brush. Stir thoroughly before using. Be sure that the surface is dry and free from grease and dirt.

Allow twenty-four hours between coats; Enamel-ite dries free from dust and tack in from six to eight hours. It can be rubbed in forty-eight hours. A perfect decorative enamel finish.

One gallon cans.....	Per gal. \$4.00
Half gallon cans.....	4.10
Quarter gallon cans.....	4.20

## Regal Liquid Wood Filler.

For Filling Pine, Cherry, Birch, Maple, Poplar, Cedar, Red Wood, and all close-grained woods.

Being perfectly transparent, it preserves the colors of the lightest wood. It fills the pores completely, leaving a hard and smooth surface for varnish.

It is applied the same as shellac or varnish and requires no sandpapering or rubbing off.

It is always of the proper consistency, never leaving a hard sediment in the bottom of the package, as is the case with many liquid fillers.

On open grained wood a paste filler should be first applied.

One and five gallon cans.....	Per gal. \$2.30
Half gallon cans.....	" 2.40
Quarts.....	" 2.60

## Henry Bosch Co.'s Paste Wood Filler.

In natural oak, red oak, antique oak and walnut or any shade wanted, made to order. A permanent paste wood filler that works easy and cannot be excelled. For open or coarse grained woods. Fills the grain solid, does not show white in the wood, sandpapers smooth, rubs easily, and holds out the varnish perfectly.

	Per lb.
In barrels.....	\$0.10
In half barrels.....	.10
In 100-lb. kegs.....	.11
In 12½ or 25-lb. pails.....	.13
In 5-lb. cans.....	.16
1 and 2-lb. cans.....	.20

## Henry Bosch Co.'s Transparent Floor Wax.

This is without doubt the most popular and satisfactory floor wax on the market. It will cover 20 per cent more surface to the pound than any other floor wax; it is very durable and will not discolor the lightest wood. It also supplies the want created by the increased use of hardwood floors and wood carpet. It is not brittle, will neither scratch or deface like shellac or varnish, and is not soft and sticky like beeswax. It contains the good qualities of both, and is, therefore, particularly adapted for finishing floors.

1, 2, 4 and 8-lb. cans.....	Per lb. \$0.60
-----------------------------	----------------

For terms and other information see page 3.

## White Leads. H. B. Co.'s Standard White Lead.

Do not fail to try our standard lead in oil. The only lead and zinc combination that has proven vastly superior to any strictly pure white lead for all general painting purposes. Being 80 per cent pure white lead (old Dutch process), and 20 per cent strictly pure zinc, you will find it is whiter, takes more oil, covers more surface, and does not chalk—which lead will certainly do when used alone. Tints and shades made from it are far more permanent on exterior work than other lead.

A painters lead that is most satisfactory to property owners, and will be found cheaper to use than any strictly pure or low priced leads.

Put up in 12½, 25, 50 and 100 lb. kegs, and 300 lb. casks.  
Price per lb., net.....\$0.07

### Strictly Pure White Lead.

We carry a full line of the best manufactures in strictly pure white lead, and can give you any brand you may call for.

The favorite and world-renowned brand of

### McBirney & Johnston

has been tried and proven satisfactory for the last twenty years, and we heartily recommend it. Put up in 12½, 25, 50 and 100 lb. kegs and 250 lb. casks, all at the special low rate of \$7.50 per hundred lbs. net.

We also carry in stock such brands as

### Red Seal, Southern & Shipman,

put up in 12½, 25, 50 and 100 lb. kegs and 250 lb. casks. Price \$7.50 per 100 lbs., net.

### Western Lead Co.'s St. Louis Red Star Brand

has the reputation of being one of the very best of the many low-priced leads now manufactured, and the satisfaction you have in turning out work that stands out for itself and is a credit to you in every way, send a trial order and give this wonderful stock a fair test.

Put up in 12½, 25, 50 and 100 lb. kegs. Per lb., net, 4c

### Raw and Boiled Linseed Oil, Etc.

We handle only the product of the oldest and best mills and we guarantee every gallon that we sell to be the very best obtainable. The boiled oil is old Dutch process kettle-boiled.

Quotations are the market values at time we go to press, and are subject to change without notice.

For latest reports on Lead, Turpentine and Benzine, see "Markets," page 9.

## Pure Colored Paint or Tinted Lead.

It is safe to say that few, if any, paints which have been put upon the market have given such universal satisfaction.

It is a paste paint, made of pure pigment ground in pure refined linseed oil, and is to be thinned with oil (and dryers when required) in the usual way.

It covers one-third more surface and wears longer than a paint made from white lead alone.

	In 12½-lb. cans	In 25-lb. cans
White and thirty choice colors, per lb.....	\$0.14	\$0.13

## Metalastic

A perfect carbon, graphite and linseed oil paint and protecting metal surfaces. Is thinned gallon for gallon with boiled oil. Very durable and economical and has great covering capacity. Two shades, brown and black.

Gallon cans.....	Per gal	\$2.70

## Wheeler's Patent Wood Filler

The Old Reliable. The Best  
Years Ago. The Best  
To-Day.

Because it covers more surface, fills better, works easier and is the only wood filler on the market that will not shrink in time and leave the pores of the wood open.

The cost of Wood Filler is the smallest part of your finishing material, but it's the foundation for your varnish.

## Paste

- No. 1. Transparent for light woods.  
No. 2. Walnut or Light Antique Oak.  
No. 10. For Ebony.

## Wheeler's Liquid Wood Filler

The transparent Crystal Rock Silix in this filler, together with the best varnish gums will fill the close grain in Georgia Pine, Cypress, White Wood, etc., in a vastly superior manner to any of the so-called liquid fillers on the market, which are composed of cheap rosin, varnish, whitening, plaster paris, lime, gypsum or other ingredients, all dangerous to use under varnish.

Gallons.....	" 2.80
5 and 10-Gallons.....	per gal. 2.70

## Breinig's Improved Penetrating Stain and Wax Finish

The advantages of these stains are that they may be used on oak, ash, pine and other woods to produce Weathered or Flemish Oak results in one operation. By applying these stains to the wood, allowing them to remain on the surface, and then wiping off the surplus stain that has not struck in, and rubbing the wood thoroughly with a dry cloth, a Weathered or Flemish Oak result is produced with a waxed finished surface in one operation. Because of the special ingredients incorporated in these stains, they produce a much more finished effect in one operation than any other one coat stain on the market.

These stains are manufactured in six colors: Weathered, Light Weathered, Flemish, English, Green, Weathered Oak, and Brown Oak.

**Johnson's Prepared Floor Wax.**

For a complete finish and polish for all wood. Is in paste form, is applied with a cloth, and polished with a dry cloth, polishing mitt or weighted brush. Johnson's prepared wax contains a larger percentage of polishing wax than any other floor wax on the market, and for this reason it covers 20 per cent more floor space, and requires very little labor to bring it to a beautiful and lasting polish.

Per lb.

Put up in 1-lb., 2-lb., 4-lb. and 8-lb. cans .....\$0.60

**Powdered Wax.**

For Ball Room Floors.

Prepared specially for ball room floors. It should be sprinkled lightly over the surface of the floor and the feet of the dancers will immediately put the floor in perfect dancing condition. Will not ball up under the feet, will not create dust, and is inexpensive, as one pound will cover 10,000 square feet. Put up in 1-lb. packages.

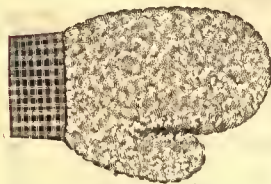

Per lb.....\$0.70

**Johnson's Kleen Floor.**

Specially for cleaning floors, and putting old floors in condition to receive a finish. This preparation does not remove the old finish, it simply removes the dirt and marks in and above the finish. Put up in gallon and quart cans.

Gallon cans.....\$3.50

Quart cans.....1.00

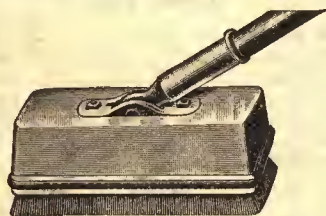

**Johnson's Polishing Mitt.**

Our latest device for polishing furniture and woodwork, and even for touching up spots upon a floor. They are made of sheep-skin with the wool on; are open across the back, and are slipped on the hand, making it very easy to polish all surfaces. It is

much more convenient than a cloth and will last for years. When dirty, clean with benzine or gasoline.

Each.....\$0.50

Per dozen.....5.00

**Floor Waxing and Polishing Brushes.**

Iron weighted, with rubber protected edges and sides. A superior brush for waxing and polishing wood-carpeted, inlaid and hardwood floors. These brushes are made of the strongest and best stock, and will not mat down by either weight or service.

No. 15. Weight, 15 pounds.....Each, \$3.00

No. 25. Weight, 25 pounds....." 3.50

Extra brush for No. 15....." 1.00

Extra brush for No. 25....." 1.30

**Johnson's Wood Dyes.**

For artistic tinting and coloring of woods. With these dyes, inexpensive woods, such as cypress, Georgia pine and fir can be made almost as beautiful as hardwood. This dye is not oil, water, or alcohol stain. It is something entirely different. It will not raise the grain of the wood, and it is impossible to apply it so it will show a lap. It is put up in the following shades: Weathered Oak, Dark Mahogany, Flemish Oak, Manila Oak, Light Oak, Bog Oak, Dark Oak, Light Mahogany, Moss Green, Mission Oak, Brown Flemish, Weathered Oak. It is applied with an ordinary brush and afterwards finished in wax or varnish. On all shades are the same.

Gallon cans.....\$4.00

Quart cans.....1.00

Pint cans......60

**Johnson's Electric Solvo.**

The most effective softener of varnish, shellac, paint, wax or any other finish on wood, iron or glass. It should be used when necessary to entirely remove the old finish. This preparation will immediately soften paint and varnish no matter how many coats or how old, so it may be easily removed with an ordinary painter's putty knife and excelsior, leaving the wood in its original condition. This preparation will keep the finish soft three or four hours, giving plenty of time to properly remove it. This solvo does not quickly evaporate, and for this reason there is a great saving of material used.

Gallon cans.....\$5.00

Half gallon cans.....2.70

Quart cans.....1.40

Pint cans......70

**Johnson's Floor Finish No. 1.**

A preparation prepared specially for kitchen, bath room, and store floors, and all floors that must be scrubbed with soap and water. This preparation is more of a floor dressing than a floor polish. It preserves the wood, preventing it from becoming soft and gray under the constant action of soap and water. This finish dries hard so it will not gather dust and dirt, also prevents the wood from absorbing dirt and grease.

Gallon cans.....\$3.00

Quart cans.....1.00

**Johnson's Paste Wood Filler.**

Made from best grade of Connecticut silex, pure linseed oil, and best turpentine Japan dryer. Suitable for filling all hard and soft woods. It properly prepares the wood for wax or varnish finish. Our regular filler is tinted so it will not show white in the grain of light woods. For golden oak use our dark filler. Two shades, light and dark.

Per lb.....\$0.24

1, and 2-lb cans......20

5 and 10-lb cans......18

25-lb. cans......18

**Johnson's Crack Filler.**

Prepared specially for filling cracks in floors and other wood work caused by shrinkage. It is applied same as you would apply putty and is a much superior article, as it is non-shrinking. Put up in 1-lb., 2-lb., and 5-lb. cans.

Per lb.

1 and 2 lb. cans.....\$0.32

5 lb. cans......30

**Johnson's Under Lac**

Is a first coater, specially adapted for finishing pine and fir. It is applied on hardwood over paste filler, or stain, where a very high polish is desired. We recommend it highly as a basis for wax for standing finish.

Gallon cans.....\$4.00

Quart cans.....1.20

## Muralo Company's Calcimo.

### A Perfect Cold Water Calcimine.

A dry powder ready for immediate use when mixed with cold water, milled in 14 different tints, and in white, made of very best whiting and glue, does not fade or rub off.

	Per lb.
White and light shades, in 350-lb. bbls.	\$0.07
" " " " " 100-lb. kegs.	.07½
" " " " " less quantities.	.09

Calcimo covers well, one coat, spreads easily. One pound will cover from 60 to 100 square feet, according to the kind of surface to be covered.

To five measures of calcimo add three measures of cold water, stir for a minute or two and the Calcimo is ready for use. If too thick add a little water. Calcimo gradually thickens or jells soon after it is mixed.

### Calcimo Fresco Colors.

A very complete series of colors, for all kinds of artistic fresco painting and decorating, can be used alone when dark colors are desired, or can be mixed with Calcimo tints or white to produce any wished for intermediate shades. Are milled to a fine powder, properly sized, and ready for use when mixed with cold water,

## Hygienic Kalsomine.

Hygienic Kalsomine, the most brilliant, durable and sanitary wall-finish in the market; has only the purest and best materials in its composition; ready sized; all that is necessary to do is to use hot water as per directions which go with each package.

It contains no Whiting, Gypsum, Plaster of Paris, or any foreign material of that nature.

It will not show laps or brush marks.

It makes a smooth and velvety finish.

	Per lb.
In barrels and half-barrels—

They are ready for use when mixed with hot water.

These colors are sized and milled to an impalpable powder. Each color is prepared with the right quantity of size.

When mixed with water will remain in good working order for several days.

**Fuller's Wall Paper Cleaner.**

Cleans cleaner, goes farther, works easier, costs less than anything else on the market. The one great success. It does not streak the walls, but brings them out as bright and clean as new. Requires no previous experience to work it successfully. Will keep forever the way it is put up without the least deterioration. It comes in the form of a powder and is made ready for use by simply mixing to a putty with cold water. A child can mix it and use it. One man can clean from three to five rooms a day, make big money and do perfect work. Put up in neat paste-board cans, containing one pound of the

powder, enough to clean two rooms.	Per lb.

**Stic-Rite**

Is a cold water paste in powder form for paper-hangers' use.

It is extremely white. It is transparent. It immediately absorbs the water free from lumps, and makes a most perfect paste far superior to any of the cooked or ready-made pastes. It never separates, always remaining the same. It never forms a crust or skin on top. It is adapted to the most delicate papers. It never deteriorates, remaining in good condition until used. It can be used in the place of gums, glues or dextrine. Its relative cost is much less than any other paste. One barrel of Stic-Rite will make about seven barrels of ready-to-use paste. It saves 80 per cent of freight.

**Sisk's Paper Hangers' Patent Sizing.**

A satisfactory sizing for painted, kalsomined or lime-washed walls and ceilings, and something which can be relied on and which needs no scraping or washing to prepare the surface, has long been looked for by practical paper-hangers.

Sisk's Paper Hangers' Patent Sizing is just the thing to prepare such surfaces with safety.

The first trial of this sizing by any practical paper-hanger will convince him of its merits. It works easy and dries quick, therefore a surface can be prepared sooner by the use of Sisk's Paper-Hanger's Patent Sizing than by any size or method on the market.

Add 1 gallon of sizing to 3 gallons of hot water, which will make size enough to prepare twelve rooms at a cost of about 8c per room.

## Mortell's Interior Wall Paint.

A new discovery; an absolutely washable, unfading paint, for interior use. Dries dead flat, with a soft rich, velvety water color effect.

Mortell's Interior Wall Paint can be applied over any kind of surface, such as wall paper, muslin or canvas, burlap, steel ceilings, etc. It is absolutely waterproof and unfading, and as it contains over two-thirds linseed oil it works more freely and far easier, besides having greater spreading capacity, than flat turpentine colors. It produces the same effect as the finest water color work, and in addition to being permanent, it requires no stippling to take away brush marks. A wall can be painted with it as many coats as desired and positively will not peel or blister. Another point in its favor is that a wall painted with it can be re-painted, changing the color ten shades lighter with but one coat; less expense than to wash off and retint in water color. Mortell's Interior Wall Paint is not a turpentine color, but contains two-thirds linseed oil; the secret lies in flating the oil. Send for color cards.

Mortell's Wall Paint is made in heavy liquid form; in White, Tinting White, Shades A, B, C, D and All Solid Tinting Colors. The Tinting White can be tinted with colors ground in oil for making light shadees such as A, B, C, D or deeper, as shown on color cards.

**Lightning Rubbing Pad.**

Saves 200 per cent in labor. Pays for itself by the Pumice Stone it saves. Does better work than any other known pad. Can be used with oil, water or acids. Indispensable to every painter for rubbing varnish, oil finish, etc. If using linseed oil always use raw oil, as the hoiled oil will become thick and sticky. Dilute the oil with one-half turpentine or benzine; it will rub faster and prevent the pad from clogging up. If you rub with water you can accomplish twice the work in the same time as you would with oil. When rubbing with water always wipe the work off with raw oil—this takes no more time than rubbing with oil, as the oil must be rubbed off and dry in both cases. Wipe the beading, mouldings, carving, etc., with a stiff brush dipped in oil.

Throw the pad into water to prevent it from becoming hard over night.

# Henry Bosch Co's Fine Varnishes.

Their perfect adaptability to each purpose to be served in their use, and the confidence that can be placed in the various brands offered, are the leading combined reasons that have placed our line in the front rank on the "varnish market." Recent improvements in each process of manufacture, and better conditions for their perfect classification, are daily bringing them into more general use and favor throughout the whole country. Our patrons know that they can depend on our representations as to grade and quality, and a trial of any of them carries the conviction that they are unusually good values, and undoubtedly good varnishes.

elasticity are required hard in 36 hours. Per gallon .....\$5.00

## Supreme Wood Finish (Interior).

Best varnish made for interior work. It is excellent for all high grade interior finishing. Is pale in color and can be used on the finest and most delicately grained woods, and produces a high and lasting gloss which does not easily mar or scratch. Will not pull under the brush and flows out smoothly. Dries dust free in 6 hours and hard in 18 hours. Can be rubbed in 48 hours and polished if desired.

Per gallon .....\$4.00

## Wau-Kon Floor Varnish.

Wau-Kon Floor Varnish has been made expressly for this purpose and can be used with success on new or old floors. Also makes an excellent varnish for linoleum. It has been specially selected for its ease of application as well as for its high gloss, remarkable drying and elastic qualities, and its resistance to all marks from heels or furniture, even under the hardest usage. It is worthy of the strongest praise, and we recommend it in the highest way. It dries dust free in about 8 hours, with a tough, wear-resisting gloss, can be walked on the next day, and becomes thoroughly hard the second day.

Per gallon .....\$4.00

## Hard Wearing Floor Finish.

Is especially adapted for finishing floors, hardwood or painted; is very tough and elastic, will stand repeated washing and will not turn white.

Per gallon .....\$3.50

## Elastic Floor Varnish.

These goods are not quite as light in color as our Floor Finish, and are especially adapted for quick work. The best medium price floor varnish on the market.

Per gallon .....\$2.80

## Granolite Interior Finish.

Especially adapted for halls, bathrooms and general inside house work where great durability is desired. Will stand water without turning white; dries, free from dust, in seven to nine hours, and can be rubbed or polished in two or three days. Per gallon .....\$3.50

Prices are for one and five-gallon cans, per gallon, cased for shipment.

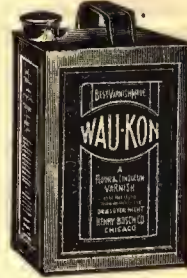

For half-gallon cans add 10 cents per gallon, net.

For quarter-gallon cans add 25 cents per gallon, net.

Special quotations for 25, 50, 75 and 100-gallon lots on application.

## Spar Preservative.

An extremely durable varnish, made especially for front doors, store fronts, bath rooms and all purposes where great durability and Dries out of dust in 4 to 6 hours, and

## Regal Cabinet Finishing

Is similar to our Granolite Finish, but dries quicker and is lower in price, has a fine gloss and dries hard over night. A very durable varnish for all interior work; can be rubbed and polished; will not spot or stain. It dries a little slower than hard oil finish, and is far superior to any made.

Per gallon .....\$3.00

## Regal Coach Finishing.

We cannot say too much in recommending this varnish for interior work, either old or new; easy flowing, has a fine gloss and is durable. Dries in about twelve hours, and is adapted for all first-class interior work.

Per gallon .....\$3.00

## Pale Coach.

Is especially adapted for high grade inside finishing. Will not water-stain or spot, and a beautiful rubbed and polished finish can be produced with very little effort, as the goods dry quickly and hard and are elastic. A first-class interior finishing varnish.

Per gallon .....\$2.80

## No. 1 Coach

Is a superior grade of interior finishing varnish, when a tough, quick-drying varnish is desired. Can be left in a gloss finish, or it can be rubbed and polished. A good all around varnish for general use.

Per gallon .....\$2.50

## Crystal Hard Oil Finish

Is very pale, easy working, with a good body, dries in eight to nine hours, and can be rubbed within forty-eight hours. Intended for general interior work.

Per gallon .....\$2.50

## Light Hard Oil Finish.

Light in color, good body, is intended for cheap work where rubbing is not wanted. Dries in 12 hours.

Per gallon .....\$2.20

## Extra Batavia Damar.

Cut cold from selected Batavia Damar Gum; perfectly white and clear, heavy bodied and dries well.

Per gallon .....\$3.50

## No. 1 White Damar.

A good cheap Damar, not so light in color as our Batavia white.

Per gallon .....\$3.00

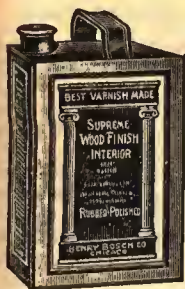

## First Coater.

This is a linseed oil varnish, but it dries so quick and hard that it is used largely as a substitute for shellac as a filler, and can be used for any undercoat work.

Per gallon .....\$2.00

## Henry Bosch Co's Fine Varnishes. Continued.

### Extra No. 1 Furniture.

Flows freely, levels down well, a fairly light color, dries quickly.

Per gallon.....\$1.50

### Bar Top Finish.

A very satisfactory varnish for all bar tops and Bar Fixture work. Dries quickly with a flint like surface, and is not affected by Alcoholic liquors or water.

Per gallon.....\$4.00

### Dry Hard Seat Finish.

A hard drying varnish at a moderate price, suitable for church and school furniture and similar work. It dries with a full lustre and will not soften under heat. It dries out of dust in four hours, hard in 36 hours and can be rubbed. Per gallon.....\$4.50

## Regal Liquid Wood Filler.

For Filling Pine, Cherry, Birch, Maple, Poplar, Cedar, Red Wood, and all close-grained woods.

Being perfectly transparent, it preserves the colors of the highest wood. It fills the pores completely, leaving a hard and smooth surface for varnish. It is applied the same as shellac or varnish and requires no sand-papering or rubbing off. It is always of the proper consistency, never leaving a hard sediment in the bottom of the package, as is the case with many liquid fillers. On open grained wood a paste filler should be first applied.

Per gallon.....\$2.30

### Dry-Rite.

(A Turpentine Japan.)

A very strong solution of best dryers and turpentine, will mix with any oil or paint and dry them. Half a pint of this dryer added to 1½ gallons of raw oil will make a good strong drying oil for all weathers. On account of its great strength it is the cheapest dryer to buy.

Per gallon.....\$2.00

### White Japan.

Very light in color, light body, a strong dryer and will not thicken any paint.

Per gallon.....\$2.20

### House Painters' Japan.

A good dryer, mixes readily with oil, does not precipitate. An excellent article for general purposes.

Per gallon.....\$1.50

### T. & B. Liquid Dryer.

A strong dryer, dark in color, thin body. Mixes well with oil.

Per gallon.....\$1.00

### Turpentine Asphaltum.

Dries in about six hours. Suitable for iron work where good results are wanted.

Per gallon.....\$1.50

### T. & B. Asphaltum.

A very black varnish, made with equal quantities of Turpentine and Benzine. Intended for cheap work.

Per gallon.....\$1.10

### White Enamel Varnish.

An extremely pale high grade varnish, made from the very whitest selected hard gums. Can be used over delicate woods, and also for mixing with zinc to produce a high grade white enamel.

Per gallon.....\$3.80

## Shellacs.

The following prices do not include cans.

### Siamlac.

(The new Shellac Substitute.)

Siamlac is a spirit varnish, working as freely under the brush and drying and sandpapering as quickly and well as pure shellac, of which it is also the equivalent in all other essential points.

White, per gallon.....\$2.80

Orange, ".....2.60

### Siamlac Reducer.

For thinning Siamlac, per gal.....\$2.00

### Cabinet Shellac (Orange).

A combination of gum, orange shellac and denatured alcohol.

Per gallon.....\$4.50

### Cabinet Shellac (White).

A combination of gum, white shellac and denatured alcohol. The best that can be made.

Per gallon.....\$4.70

### Special Shellac (White).

A combination of denatured alcohol and white shellac.

Per gallon.....\$4.00

### Special Shellac (Orange).

A combination of denatured alcohol and orange shellac.

Per gallon.....\$3.80

### Fresco Surfacers Size.

For stopping suction of plastered walls and making a good surface for paint or calcimine. Our Fresco Surfacers is a superior article, and for very fine work should always be used, as it not only prevents suction, but makes a surface that brings out the colors in all their brilliancy. Where something cheaper is wanted for calcimining or plain work our Gloss Oil is recommended.

Per gallon.....\$0.90

### Gloss Oil.

A combination of benzine and rosin, used mostly for sizing walls.

Per gallon, in bbls.....\$0.48

Per gallon, less quantity......56

## The "King" Furniture and Piano Polish.

For cleaning and polishing varnished surfaces, wood or metal, carriage bodies, car bodies, enameled leather, also the parts of all kinds of machines, such as typewriters, sewing machines, etc. Produces a high and lasting polish without injury to the varnish. Makes old furniture and woodwork look like new.

### Directions:

Apply a little polish with a piece of soft cotton flannel, or cheese cloth. Rub until the dirt or spots disappear; then polish by rubbing with a clean piece of soft fabric when a high and durable lustre will appear

**Henry Bosch Co.'s Carriage Varnishes**

Prices are for one, one-half and one-fourth gallon cans, cased ready for shipment.

**English Wearing Body.**

A pale, elastic varnish, unsurpassed in durability and lustre. It is wholly reliable and safe to use in the warmest and coldest weather, sets slowly enough to accomplish a good job on the largest surfaces, dries dust free in twelve to sixteen hours. Will harden sufficiently to handle in two to three days.

Per gallon.....\$7.00

**Medium Drying Body.**

For under coats and also for finishing, where time will not permit the use of our Best Wearing Body varnish. It is pale, brilliant and dries hard in thirty-six to forty-eight hours.

Per gallon.....\$7.00

**Elastic Gear.**

Especially adapted for wheels and underparts as a finishing coat, uniform in its working qualities and not liable to shrink away when brought in contact with dead color; it sets in six to eight hours and dries hard in two days.

Per gallon.....\$6.00

**One-Coat Coach.**

For general carriage work where but one coat is practicable. This varnish dries, out of the way of dust, in about twelve hours; is light colored, makes a nice finish.

Per gallon.....\$5.50

**Heavy Gear.**

For one coat work. This varnish dries over night, is heavy bodied and very durable. Per gallon.....\$5.00

**Hard Rubbing Body.**

For under coats of bodies and gearings. Made from the best material; light in color, dries, out of the way of dust, in from eight to twelve hours, and will rub in four days.

Per gallon.....\$7.00

**Medium Rubbing Body.**

For under coats of bodies and gearings. This is of equally good quality with our Hard Rubbing Body, and dries quicker.

Per gallon.....\$6.00

**Quick Rubbing Body.**

For under coats of bodies and gearings. This varnish is not quite so pale as either our Hard or Medium Rubbing Body, but dries quicker, and will rub in two days.

Per gallon.....\$5.00

**Quick Black Rubbing.**

Is a superior article; made from our Medium Rubbing varnish and Drop Black. It will rub in two or three days.

Per gallon.....\$6.00

**Extra Wagon Coach.**

For wagons, agricultural implements, and general outside work. This has a fine lustre, is light in color, heavy bodied, dries in from ten to twelve hours, and wears well.

Per gallon.....\$3.00

**Japan Gold Size.**

For binding, drying and hardening colors. This is a very superior dryer, strong and light in color. We recommend its use in place of Japan for all good work.

Per gallon.....\$4.50

**Enamel Top Dressing.**

This varnish is used to give an intense black color to old carriage tops. Keeps the leather pliable and will dry in one or two days. Cleanse the tops well before using.

Per gallon.....\$4.00

**Berry Bros.' Liquid Granite.****For Varnishing Floors.**

It is made in two grades, A and B, the former being heavy in body and suitable for use on new floors, and the latter more limpid and intended for refinishing or restoring old floors.

Liquid Granite will be found far superior to any preparation of wax, being easier applied, more economical to use, and making a much more durable finish.

Liquid Granite is put up in sealed cans only up to five gallons.

5-gallon cans, per gallon, \$3.80 1-gallon cans, per gallon, \$4.00

Berry Bros.' Hard Oil Finish cannot be obtained in larger original packages than 5-gallon cans. Cans are handsomely labeled; full directions accompany each.

**Berry Bros.' Shingletint.****The Improved Shingle Stain and Preservative**

Besides imparting an artistic and lasting finish to shingles, greatly prolongs their life by preventing the inroad of insects and arresting decay.

The covering capacity of Shingletint depends upon the manner in which it is used. If brushed on, a gallon will cover 160 square feet, one coat, while 1½ gallons will cover the same surface two coats. From 2¼ to 2½ gallons is sufficient to dip 1000 shingles, and less than a gallon more is enough for a brush coat in addition after the shingles are laid. It is not necessary or customary, in dipping shingles, to cover more than two-thirds of their length.

We have, ready for mailing, samples of wood treated with Shingletint embracing the most popular colors now in use, and will gladly mail a set free upon application.

**Pratt & Lambert's Fine Varnishes.**

Send us your orders for the following varnishes and we will give you lowest current prices. : : :

**Spar Finishing Varnish.**

This varnish was originally made by us for spars, masts and woodwork on ships and yachts, hence its name "Spar," and having proved such an excellent article for that purpose we commend it to the painters and the public

In general who have long felt the need of a first-class outside varnish that would not crack, turn white, crawl, pit or bloom. Our Spar is faultless, has a high gloss and works freely under the brush. It is not affected by salt or fresh water. For all exposed work, like front doors, bathrooms, shingles, blinds, store fronts, hard and soft woods it has no equal.

Special price on application.

**No. 38 Preservative Varnish.**

This varnish is very similar to our Spar Finishing Varnish, only made to dry quicker and not so light in color. A very desirable varnish for inside or outside work where it has not an extreme exposure. It is highly recommended for kitchens, bathrooms, floors, etc. Can be rubbed or polished.

Special price on application.

**No. 110 Cabinet Varnish.**

Is made on similar principles to our No. 38 Preservative Varnish, but dries quicker and is lower in price. Has a fine gloss and dries hard over night. A very durable varnish; can be rubbed and polished; will not spot or stain. It dries a little slower than hard oil finish and is far superior to any made.

Special price on application.

**No. 61 Floor Varnish.**

In this varnish we have combined all the essential features necessary to make a satisfactory floor finish. It dries quickly, is exceedingly tough, so it will not scratch or mar; is not affected by water, and is the most durable floor finish made. Try this varnish in comparison with any other floor finish on the market, and the result will satisfy you of its superiority.

Special price on application.

**Liquid Wood Filler (Light).**

An excellent filler for all close fibre woods. Is transparent when applied, and does not need to be rubbed off, although when fine finish is desired it can be sand-papered with fine sand-paper. Apply with a brush, and when perfectly dry apply varnish. Is equal to one coat of varnish.

Special price on application.

**Pratt's Patent Liquid Dryer.**

This dryer is indispensable in any paint shop, for there is nothing so good to dry oil, or oil and paints, rough stuff or varnish, as this dryer. It has no sediment.

Special price on application.

**Alcolac.****The 20th Century Shellac.**

An article of unique merit, which may be used as a primer or first coat over hard or soft woods. It forms a hard, impervious coating which prevents suction and holds out the finishing coats of varnish to a remarkable degree. Is superior to spirit shellacs. Alcolac works easily under the brush, is pale in color, and is positively the most economical and satisfactory first coat ever produced. Dries to sand-paper over night.

Special price on application.

**The Sherwin-Williams Varnishes.**

Prices are for goods in 1 and 5-gallon cans, per gallon.

For ½-gallon cans add 25 cents per gallon net.

For ¼-gallon cans add 40 cents per gallon net.

Special quotations for 25, 50, 75 and 100-gallon lots.

**The S-W. Finest White Enamel Varnish.**

Suitable for the very finest white enamel work. It is the palest varnish that can be made from hard gum. It mixes perfectly with zinc, and an enamel made with it can be hand polished in 4 days.

In one gallon cans.....per gallon, \$7.50

**The S-W. Durable Wood Finish (Exterior).**

It will stand the severest outside exposure and is not affected by weather or sun. Will not turn white nor lose its gloss and is extremely durable. It is the very best varnish for store fronts, doors, signs, etc. It dries out of dust in 10 hours and hard in 48 hours.

In one gallon cans.....per gallon, \$7.00

**The S-W. Durable Wood Finish (Interior).**

The most durable and lasting interior finish that can be produced. It is not affected by steam or water and will wear with perfect satisfaction in bath rooms, kitchens or laundries. It is very transparent and gives a desirable depth and richness of finish to the finest woods. It is exceedingly easy and smooth working. It dries dust free in about 6 hours with a rich lustre, and can be rubbed in 48 hours. To get the best results, use the varnish itself all the way through from foundation coat to finishing coat. For first coat thin slightly with turpentine; for succeeding coats use as it comes in the can.

In one gallon cans.....per gallon, \$4.50

**The S-W. Pale Flowing Cabinet Varnish.**

Is a medium pale, easy working varnish, which flows out freely and dries dust free in from 3 to 4 hours. It becomes hard in 24 hours and can be rubbed in 48 hours. It is especially suitable for interior finishing on medium priced house work and is very popular with the Master Painter, for whose use it is especially intended.

In one gallon cans.....per gallon, \$2.70

**The S-W. Hard Oil Finish.**

This is the same as above, but slightly darker in color. It is suitable for all ordinary woods. Dries dust free in from 6 to 8 hours, hard in 24 hours, and can be rubbed to a fine finish.

In one gallon cans.....per gallon, \$3.20

**The S-W. Bar Top Finish.**

This varnish is made especially for bar tops and other surfaces subjected to severe usage. It will not turn white, spot or crack from alcohol or water. It is pale in color, will dry dust free in 2 hours, and becomes hard enough to rub in 48 hours.

In one gallon cans.....per gallon \$7.00

**The S-W. Hard Drying Oak Varnish.**

A hard drying varnish for inside use. Especially suited for church and school furniture and similar work. It has a good lustre, dries without tack, and will not soften under heat. It dries out of dust in 6 hours, hard in 36 hours, and can be rubbed.

In one gallon cans.....per gallon, \$4.20

**The S-W. Interior Coach Varnish.**

An especially pale, easy working varnish, for interior use. Dries with a high lustre in 24 hours.

In one gallon cans.....per gallon, \$2.50

**NOTICE: DO NOT SEND PERSONAL CHECKS. REMIT BY POSTAL OR EXPRESS MONEY ORDER OR DRAFT ON NEW YORK OR CHICAGO.**

### Finish No. 1 for Exterior Work.

For finishing front doors and all classes of house work exposed to the weather, where greatest durability is required. Dries, free from dust, in from ten to twelve hours, and dries sufficiently in about five days to admit of being rubbed.

Per gallon.....\$7.00

### Finish No. 2 for Interior Work.

Especially adapted for hallways, bathrooms, diningrooms, kitchens, floors, bar fixtures and general house work, requiring a finish of extreme durability. Dries, free from dust, in from seven to nine hours, and hardens sufficiently to admit of being rubbed in about three days. It is very elastic and will not mar white.

Per gallon.....\$5.00

### Gutta Percha Floor Finish.

Dries hard over night, under favorable considerations, with the hardness of gutta percha. On old and new natural wood floors, properly filled, and on painted

floors, one coat is sufficient. Does not scratch or mar white.  
 Per gallon.....\$5.00

### Flattine Wood Finish.

Intended for finish coat over gloss-finished work, to give the appearance of a rubbed finish, thus saving the labor and expense of rubbing with pumice stone or oil, or pumice stone and water. Is very durable, and resists the action of water and dampness better than any varnish. Dries over night.

Per gallon.....\$5.00

### Gutta Percha Hard Oil Finish.

A very high grade, pale oil finish. Dries, free from dust, in two to three hours, and sufficiently hard in about forty-eight hours to admit of being rubbed. Surpasses all other oil finishes in the market in paleness, easy working properties, lustre, toughness and durability.

Per gallon.....\$3.00

### Gutta Percha Interior Coach.

For interior house work requiring a very high gloss finish. Dries sufficiently hard over night to be handled and can be rubbed within three days. Owing to its extraordinary intrinsic body and lustre, one coat over our Standard Turpentine Shellac will produce a full and satisfactory finish on close-grained woods. The same applies to open-grained woods that have been first filled with Paste Wood Filler.

Per gallon.....\$3.00

### Standard Turpentine Shellac.

For priming coat on all classes of natural wood. Dries sufficiently hard over night to admit of being sand-papered. Forms a hard non-porous coating, which effectually prevents suction of the varnishes applied over it, and holds them up to a remarkable degree.

Per gallon.....\$3.00

### Gutta Percha Cabinet Finish.

A high grade hard drying interior varnish, especially adapted for rubbing and polishing.

Per gallon.....\$4.00

## Ad-el-ite Paint Varnish Remover.

Is exactly what the phrase implies, "A plain story, honestly told." You can never fully appreciate the merits of this wonder worker until you have put it to the test, which will prove to your own satisfaction that we have a remover of exceptional value. Its peculiar penetrating qualities enables it to eat down through any number of old coats of hard paint, varnish, or shellac, rendering it immediately removable with a rag, and it leaves the wood in perfect condition for re-finishing. It possesses absolutely no objectionable features. It will

not injure the finest veneer, your hands or your clothing. You will find it a wonderful **TIME AND LABOR SAVER.**

Quarts.....\$1.50  
 Half gallons.....2.70  
 Gallons.....5.00

## Ad-el-ite One-Coat Dull Finishes.

Is a stain and finish in one.

It is easily applied and the results are invariably swift and sure. With its use anyone with moderate care can refinish their furniture or woodwork in dens, libraries, halls and dining-room, etc., with little labor and with a surprisingly small expense. A single application will produce that dull, velvety, old mission effect so popular to-day.

It is prepared in many shades and will cover twice the surface of the ordinary varnish finishes. It brings out the natural grain beauty, will not mar or scratch and will wear indefinitely.

Unequaled for durability, economy and beauty. Dry hard in twenty minutes and are moisture proof. One coat does the work of two or three coats of other finishes and can be used on any wood. Made in the following shades:

M-I. Dark Weathered Mission Oak. M-II. Medium Weathered Mission Oak. M-III. Light Weathered Mission Oak. M-IV. Bog Mission Oak. M-V. Fumed Mission Oak. M-VI. Natural Mission Oak. M-VII. Brown Flemish Mission Oak. 437. Black Flemish Oak.

**NOTE—Always Order by Number.**

One gallon will cover approximately 800 square feet on new or old well-surfaced hard wood.

#### Waukegan "C" Trimmer.

Each turn of the crank trims 8 inches. No gearing. Otherwise same as "B." Price.....\$12.00

#### Waukegan "D" Trimmer.

Each turn of the crank trims 18 inches of paper on both edges at once, or trims and splits border. Price.....\$20.00

#### Waukegan "E" Trimmer.

Each turn of the crank trims 7¾ inches. Otherwise same "D." Price.....\$18.00

### Eclipse Double Edge Trimmer.

The Easiest Running Machine Ever Made.

Patented February 26, 1901.

The Eclipse is the best double edge trimmer manufactured. Its principal features are: Will trim perfectly all grades of paper on both edges and leave a clean edge for butting.

Easy running, noiseless, rapid and simple in construction, all cut gears.

Sprockets and chain for winding rod, in place of belt.

Positive regulation by screw feed for guiding the paper to the cutting edges.

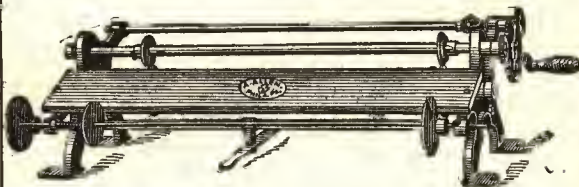

Instant adjustment of both cutters by moving the top one only.

Lower cutters can be removed instantly for cleaning without taking machine apart. This is a very important item, and exists only in this trimmer.

Every machine is guaranteed to be first class in every respect

No. 300.....each. \$40.00

### Double Edge Keystone Trimmer.

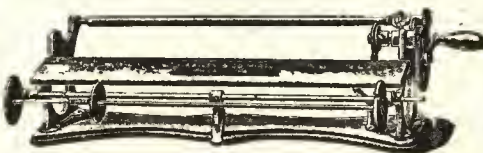

A rapid light running machine. Will cut the paper straight and clean, suitable for butting. Trimming up to 22-inch paper, and has a capacity from 100 to 200 rolls per hour. Undoubtedly the best machine ever offered to the trade.

Has two sets of cutting knives. Trims both edges of the paper at the same time.

No. 1 Double Trimmer.....\$33.00

### Single Edge Keystone Trimmer.

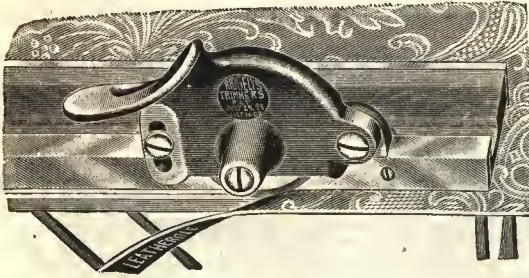

This trimmer is same as double machine, except that it has but one set of cutting knives, and will trim only one edge of paper.

No. 2 Single Trimmer.....\$20.00

**NOTICE: DO NOT SEND PERSONAL CHECKS. REMIT BY POSTAL OR EXPRESS MONEY ORDER OR DRAFT ON NEW YORK OR CHICAGO.**

**Ridgely's Ideal Trimmer.**

Will cut heavier goods with less weight than any trimmer made. It is the easiest handled; is more compact, stronger and less complicated than any other trimmer. The trimmers are nickel plated; the straight edge is made of the best seasoned lumber and brass bound on both edges; the front edge having an angle brass, protecting the edge from warping both ways. This straight edge alone is well worth the price of the entire outfit.

**Ridgely Paper Hangers' Plumb and Level.**

Can be used with any straight edge. Will give a plumb or level instantly from floor to scaffold. For putting up plate rail it is indispensable. Guaranteed to be absolutely accurate. Weighs, 4 ounces; can be carried in the pocket.

Highly nickeled and packed in nice box with full instructions how to use. Plumb and Level. Each.....\$2.50

**Ridgely's Graduating Plumb and Level.**

This tool is designed for those preferring a Plumb and Level embedded in their Straight Edge, and it's a wonder. The inner bushing holding the bubble can be easily turned to any graduation and always remains where placed.

The two outer bands form a friction clutch for the bubble bushing, at the same time hold the level firmly in the edge by means of the two screws. The entire tool is sunk in the edge leaving a smooth surface and can be used from either side.

It will not only give a plumb or level but for panel or relief work will give you any degree or angle desired instantly. This cut shows the tool as it appears sunk and ready for use.

As it is only necessary for the paper hanger to have a distinct plumb or level line 2 or 2½ feet long, many of them

prefer the level sunk in a 2½ foot edge, keeping this for plumb and level purposes only.

Ridgely's Graduating Plumb and Level can be put in any Straight Edge by any boy with ordinary intelligence.

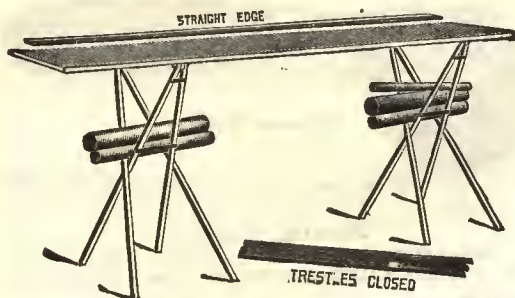

No charge for sinking the level in the regular Straight Edges.

Graduating Plumb and Level.

No. 15. 1 1/2-inch tooth blade, wood handle..... each, \$0.40

## Trowels.

No. 2. Trowel blade, 4x2 1/2..... Per doz., \$5.50. Each, \$0.50

For terms and other information see page 3.

**Paper Hangers' Shears.**

Hand forged from finest steel and welded on composition metal, hardened in water and tempered by natural gas. Perfect in pattern and finish and specially intended for paper-hanger's use. With care will last a life time.

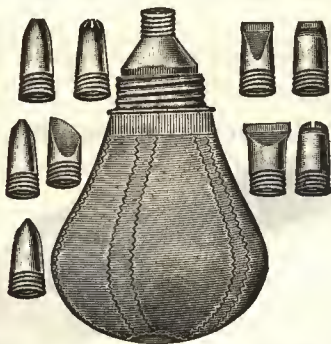

12-inch, straight handles.....	\$1.60
12 " bent " .....	1.60
14 " straight " .....	2.10
14 " bent " .....	2.10
16 " straight " .....	2.60
14 " " " left handed.....	3.00

**Handy Shears Holder.**

Just the thing for the paperhanger or decorator. A patented device that takes care of your shears and keeps them always ready to your hand. Never a moment's delay in bringing them into use or putting them back into the holder. No need of looking down while placing them into or removing them from the holder. You can't go wrong if you try. The wire guard is kept in position by a blued steel spring that yields to the swing of the shears, as you pass them into the loop. You remove the shears by lifting them upwards, till the points are clear of the metal loop. The whole device is only  $4\frac{1}{2}$  inches long by 1 inch

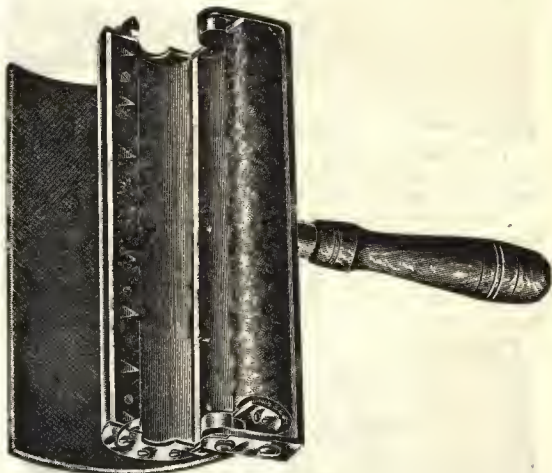

in width, weight 4 ounces. Two riveted canvas loop pieces go with each holder, these sewn on near the hip of your overalls, keep both pairs ready to attach the holder to. You can't wear this device out in a lifetime.

Price each.....\$0.80

**Relief Bulbs.**

Free Hand Relief Decorating is the most beautiful and artistic class of work that can be done with these bulbs, and is fast becoming the most popular. The most delicate designs can be rapidly executed with perfect freedom and accuracy. Any decorator can in a short time become an expert in Free Hand Relief work.

Bulbs with 9 attachments, each.....\$6.00

**Combination Stippling, Stenciling, and Paper Hangers' Roller.**

Made of brass, length of seven inches. Covered ready for use.

The roller opens to receive the ends of the plush or cloth, and when closed draws it tightly around the cylinder, leaving no seam. The covering can be taken off, washed and replaced in a few moments. In stenciling, it does not block or tear the stencil, but leaves a clean and perfect job. As a paper-hangers' smoothing roller, the advantages over other rollers will be readily seen.

Opening and closing.—Turn the catches in the slots on both ends. Place the cloth tightly around the cylinder, while open, when closing, it draws still tighter. Cut the plush so that the nap lays round the roller.

For stenciling.—Spread the color on a smooth surface; feed the roller thereon and apply to the stencil. Different colors can be spread side by side and transferred to the stencil nicely blended.

For stippling.—Let the plush be well saturated with the color. In laying off brush and feather into the finished surface. Roll the roller one way only. For laying away after finishing a job, the plush should be taken off and washed in thinners or soapsuds, or left in water. The plush will last a long time.

For papering.—Cover the felt with a piece of muslin on top to keep clean. For ordinary wall paper, heavy canvas duck for covering on the seam roller will be found better than anything else.

No. 30. 7 inches wide.....each, \$3.00

**Perforated Paint and Paste Mixer.**

Painters' long felt want; saves labor, saves time, saves money, saves splashing. No painter should be without them, made of composition metal, strong and durable, light in weight.

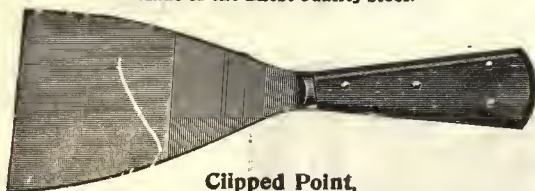

8 inch, per dozen.....	\$1.00
8 " each.....	.18
10 " per dozen.....	2.00

No. 109. Suited for ornamental surfaces, corners, etc.  
Per dozen.....\$5.50 Each.....\$0.50

## The Eriksson Floor Scraper.

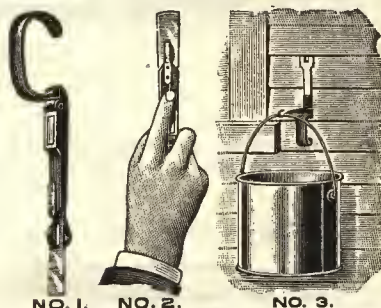

This cut illustrates the conclusion of several years' experimenting with the perfecting of a tool that will prove satisfactory for the cleaning and smoothing of old and new hardwood floors.

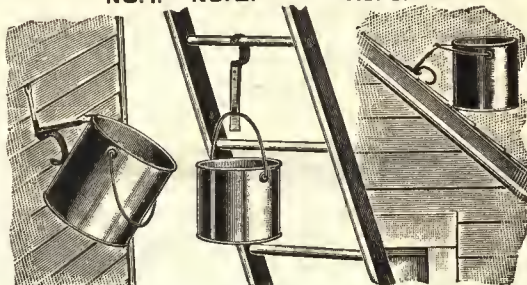

For example, on August 17, 1904, the inventor with the assistance of a boy scraped to a finish, ready for varnish, 1,500 square feet of maple flooring in 10 hours. On February 25, 1905, he scraped a much worn oak parquet floor with border, 16x18 in all, which had previously been coated with mineral filler, several coats of shellac, floor varnish, etc. After four hours of work one could hardly detect that it was an old floor.

With the above experience proves that without a doubt that this simple tool is far more practical than any of the other more complicated patents for this purpose on the market.  
Each.....\$6.00

## Combination Putty Knife and Pot Hanger.

NO. 1. NO. 2. NO. 3.

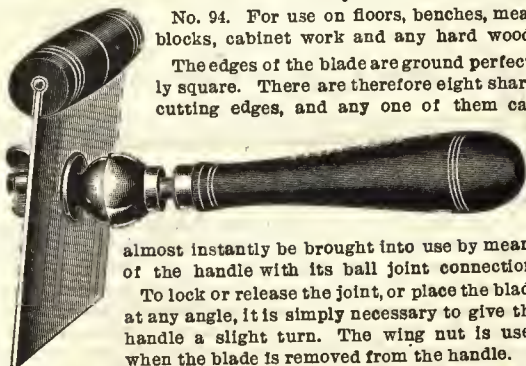

NO. 4. NO. 5. NO. 6.

This is the only practical tool on the market for attaching Paint Pots to Clap-board and shingled walls. The heavier the pot the more securely it is held. Especially designed for puttying, also scraping peeled paint. It is made of malleable iron, with a tempered steel blade and hook.

Painters hang your paint near your work when drawing sash, working about cornices, and on slanting roofs and towers with the Combination Putty Knife and Pot Hanger. Every painter should have one of these tools.

No. 3. This cut shows tool in position holding pot by the bail.  
No. 4. This is the most convenient way of suspending a paint pot. The bail is not in the way of dipping a brush.  
No. 5. This cut shows the tool holding ball on ladder round.  
No. 6. Here we have the tool holding pot on steep roof.  
Per doz.....\$6.00 Each.....\$0.60

## Universal Scraper.

No. 94. For use on floors, benches, meat blocks, cabinet work and any hard wood.

The edges of the blade are ground perfectly square. There are therefore eight sharp cutting edges, and any one of them can

almost instantly be brought into use by means of the handle with its ball joint connection.

To lock or release the joint, or place the blade at any angle, it is simply necessary to give the handle a slight turn. The wing nut is used when the blade is removed from the handle.

The guard may be instantly slipped on or off either side or end of the blade, and enables one to use the tool with a firm grip, bearing on heavily or lightly as may be desired. It is the neatest, simplest and best all-around Scraper on the market.  
Per dozen.....\$16.00 Each.....\$1.50

## Glaziers' Diamonds.

No. 2. Cuts single thick.....	each, \$ 7.00
No. 4. Cuts double thick.....	" 10.00
No. 5. Cuts double thick.....	" 12.00
No. 8. Plate glass diamonds.....	" 24.00

Every diamond is tested by an expert before leaving our store, we therefore cannot exchange or take them back.

## Glass Cutters.

No. 5 Magazine Glass Cutters are the only practical cutters with renewable wheels. The tempered wire spring pinion can be operated with the thumb nail. The extra wheels are stored in the upper end of the handles and are absolutely secure.

Per dozen.....\$5.00 Each.....\$0.50

A novel tool and up to date. Six wheels are in a turret; when the first is worn bring the second into place, and so on till all are used or used up. Lasts six times longer than a one-wheel cutter.

No. 6. Per dozen.....\$5.50 No. 6. Each.....\$0.50

No. 3. Steel Glass Cutters, wood handles, new style.  
Per dozen.....\$1.50 Each.....\$0.16

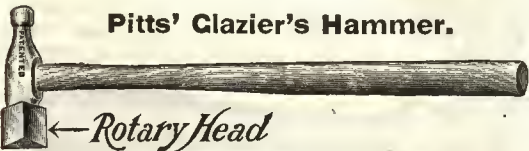

## Perfect Glazier Point Hammer.

Saves time and money. The cut shows how perfectly it is adapted to the work, can't miss the points, won't fracture the glass. You should have one.

Each.....\$0.50

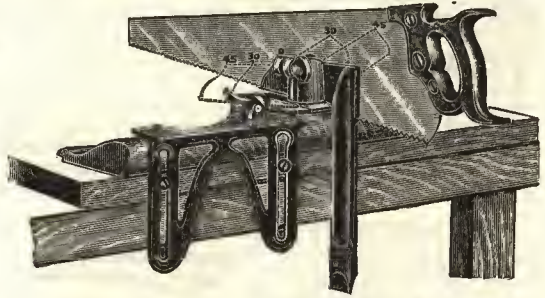

## Pitts' Glazier's Hammer.

A New Hammer for Glaziers and Picture Frame Makers. With this hammer glass can be set quicker and with more absolute security than if a chisel is used. Notice the triangular head—its shape permits it to be laid flat against the glass, no matter in what position you hold the handle when driving the points, and you can hammer away without any danger of breakage. The triangular head is reversible, is made of tool steel, and will last a lifetime. The other end is made of malleable iron in the shape of a hammer, which every person knows can be used to advantage. It is nicely nickel-plated and will appeal to every practical person at a glance.

Each.....\$1.20

## Folding Mitre Box and Saw Guide.

Simplest. Most positive. Most accurate. Most compact. Quickest adjusted. Best finished. Folds up flat. Takes up very little room. Convenient to carry. Used on top of moulding. Weighs only 2 lbs.

With two screws it may be quickly fastened to the bench, table, timber, joist, or to any flat surface with a square edge.

It may be almost instantly set to guide the saw in a straight right-angle cut, or at either 22½, 30, or 45 degrees, right or left.

The saw guide may be adjusted to accommodate any thickness of sawblade. Any ordinary saw may be used.

For moulding with irregular edges, such as nose, astragal, crown, rafter, panel, or base moulding, fasten a board to the edge of the bench so that its upper edge will come flush with the top of the moulding, then screw the Mitre Box to this board. Finished in black Japan and nickel, with gun-barrel finish on plate and lever.

Price each.....\$3.00

## Glaziers' Points.

No. 00. No. 0. No. 1. No. 2. No. 3.

Triangles, put up in one-half pound papers, 100 papers in a box. The above cuts show the exact size of points.

All sizes, per box (100 papers).....\$15.00  
Per package......16

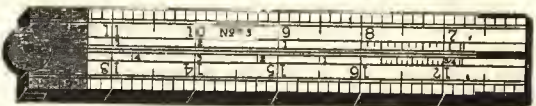

## Zig Zag Spring Joint Rules.

The most convenient pocket folding measure made. Box wood stained, nickel plated steel joints and tips; length three feet (unfolded). These rules are made of flexible hard wood, each joint containing a stiff spring, which holds the rule rigid when open. As shown in cut, there is no hole through the stock, where the joint is attached. The method of construction adds greatly to the strength of the rule. Made to extend

3-ft., 4-ft., 5-ft., or 6-ft.  
3-foot.....Each \$0.40 5-foot.....Each \$0.80  
4-foot....." .60 6-foot....." .90

## Boxwood Rules.

Two feet, four fold, eighths and sixteenths of inches.

No.	Per doz.	Each.
61. Square joint.....	\$2.10	\$0.20
65. Square joint, brass bound.....	6.00	.50

## Washing and Painting Machines.

This illustration represents our Style C Spraying Machine. The working parts of this machine are made entirely of heavy brass, both the pumping cylinder and air chamber, thus making the machine impossible to corrode from the use of any liquids. Capacity equal to the work of 18 men with brushes in the same time.  
Each.....\$50.00

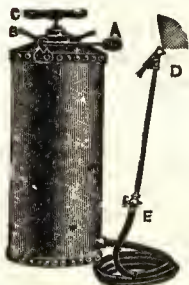

This illustration represents our Style K machine. It is a self-contained and very portable machine, its pumping apparatus is constructed entirely of brass, properly fitted to the side of a heavy galvanized iron tank. It also has an agitator to keep the liquids in motion while operating same.

Equal to the work of 10 men with brushes in the same time. Each.....\$28.00

This illustrates our Style J machine. It is a very valuable machine, being well built and heavily constructed out of brass. One man can operate this machine and from 70 to 80 pounds of pressure can be easily carried.

Will do the work of 5 men with brushes in the same time.  
Each.....\$20.00

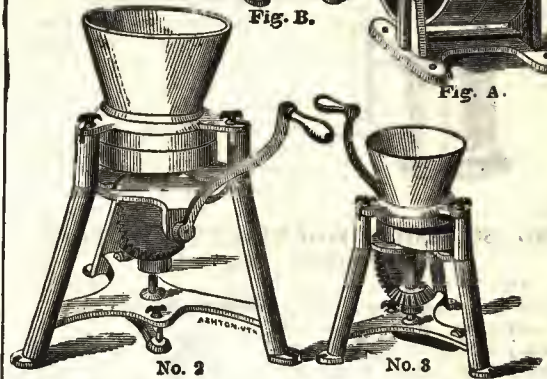

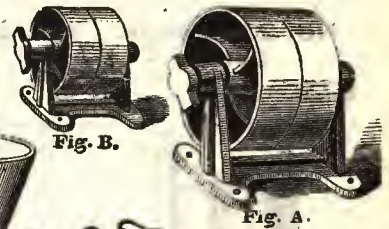

Style H machine for spraying Wall Paper. The worst part of a Wall Papering job is taking off the Wall Paper. One bucket of water in this machine will take off as much paper as six buckets will applied by brush. The water soaks in the paper and does not run down to stain the wash boards with color from the paper, and instead of putting too much water in one place like the brush does, it spreads it evenly and just enough in one place for the paper to absorb.

With this machine you can clean up 5 rooms while the old style brush workers are doing one room.

Each.....\$18.00

## Paint Mills.

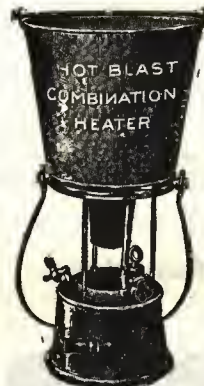

No shop should be without a good Paint Mill with which you can grind your colors in oil and utilize many things which otherwise would go to waste. We handle the celebrated Berrill Mill in the following sizes:

No. 4 Hand Mill, capacity 1 quart.....	\$ 7.50
No. 3 Hand Mill, capacity 1/2 gallon.....	9.50
No. 2 Hand or Power, capacity 1 gallon.....	12.00
No. 1 Hand or Power Mill, capacity 3 gallons.....	36.00
Mammoth Power Mill, capacity 9 gallons.....	56.00
Power Pulleys for No. 2 Mills, Fig. "B".....	9.50
Power Pulleys for Mammoth and No. 1 Mills, Fig. "A".....	16.00

## Painters' Combination Heater.

For Heating Water or Room.

This heater is indispensable for painters when working in vacant buildings during the cold weather. Full instructions go with each heater.

The Combination Heater has been made to fill a long felt want. It will heat a pail of water in five minutes and a good sized room in ten minutes. The flame is very powerful, it may also be used for heating soldering irons or melting lead, glue, etc., and is absolutely free from smoke or smell which is so common when using an oil stove.

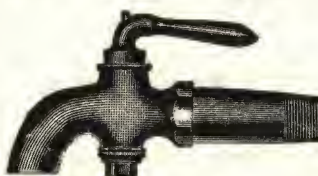

Price.....\$10.00

## Oil Cates.

Absolutely tight and, being made of metal, can easily be cleaned in lye water.  
Per doz. Each  
One-inch hole.....\$6.00 \$0.60

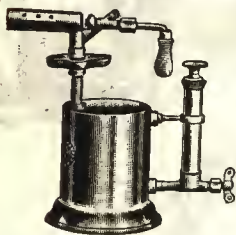

## Faucets.

Made of iron (Japaned). For turpentine, benzine, etc.  
One-inch hole.  
Per dozen.....\$10.00  
Each.....1.00

**NOTICE: DO NOT SEND PERSONAL CHECKS. REMIT BY POSTAL OR EXPRESS MONEY ORDER OR DRAFT ON NEW YORK OR CHICAGO.**

### No. 23, Electric "Hot Blast" Blow Torch. For Gasoline. Pint Size.

Has a world wide reputation, having stood the test for years, growing daily in popularity. It has been welcomed by thousands of electricians, gas fitters, dentists, linemen and those who do work calling for a "needle flame and a hot one." It is light and still powerful. The generator is made on a new correct principle, producing a solid blue flame of 1,500 degrees F.

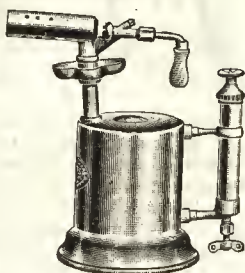

Each.....\$6.00

### No. 30. King "Hot Blast" Blow Torch. For Gasoline. Quart Size.

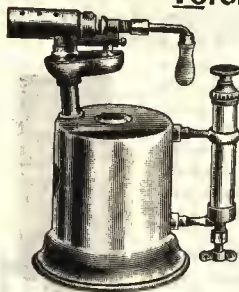

One of our best all round torches. For painters, plumbers, electricians, gas fitters and heavy trench work. Generates about 2,000 degrees F. and positively will not chill. Burns in any position.

Height to top of burner, 10 inches. Weight, 4 lbs. Capacity, 1 quart. Consumption of oil,  $\frac{1}{2}$  pint per hour at full blast. Diameter,  $4\frac{1}{2}$  inches.

Each.....\$8.00

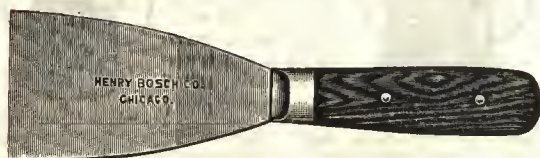

### No. 66, Fire Fly "Hot Blast" Blow Torch. Quart Size.

In this torch we offer you a strictly high grade tool as a leader. It is constructed with a strong brass tank with concave steel bottom, which answers as a funnel, and equipped with our perfect combustion burner. Compare it with other makes at similar prices. Do this and we will get your orders. Height, 9 inches. Diameter,  $4\frac{1}{2}$  inches. Net weight, 3 lbs.

Each.....\$6.00

### Half Elastic or Wide Putty Knife.

Made of finest quality steel, red cocobola handle, metal bolster. The proper tool for following after above torch for removing paint or varnish. Blade just the width of the flame, 2 inches wide by  $3\frac{1}{4}$  inches long.

Each.....\$0.40  
Per dozen.....4.00

### Plumb Bobs.

Nickel.

Each.....\$0.30

Per dozen.....3.00

### Painters' Overalls.

Made of heavy white drill, high apron, suspender back attached to waist band. This is one of the most satisfactory overalls made. All sizes from 32-31 to 42-34.

No. 200.....per pair, \$0.80

### Paper Hangers' Overalls.

Made the same as above, but has an extra large pocket, especially made for paper hangers. All sizes, from 32-31 to 42-34.

No. 300.....per pair, \$0.90

NOTE—When ordering overalls give waist and inside leg measurements.

### Painters' and Paper Hangers' Jackets.

White drill jackets, good length, one pocket. Rounded shoulder, seam in back made to fit. All sizes.

No. 400.....\$0.80

NOTE—In ordering jackets give chest measurement.

### Painters' and Paper Hangers' Caps.

Lined. Each. Per doz.

No. 500 All sizes.....\$0.20 \$2.00

### Painters' and Kalsominers' Gloves.

Made of heavy drill, well sewn, felt lined; just what every painter needs to keep his hands in condition while using the brush.

Per pair.....\$0.20

Per dozen pairs.....2.00

Gloves, same as above, with heavy knitted wristlets.

Per pair.....\$0.26

Per dozen pairs.....2.50

### Drop Cloths.

#### For Painters, Paper Hangers and Kalsominers.

These cloths are made of heavy weight material, sufficiently close in texture to protect any carpets or furniture from brush drops, etc., while the work is being executed.

9x12 12x15 14x16  
No. 10. 6-ounce heavy drill.....each, \$4.00 \$5.50 \$6.50

#### Sign Painters' Muslin.

A specially prepared Muslin for making campaign banners, signs, streamers, etc., of a temporary nature. Put up in rolls, 36 inches wide; about 125 yards long.

Price.....Per Yard \$0.24

### Muslin or Cheese Cloth.

#### For Lining Board Surfaces or Imperfect Plaster Work Before Papering.

Put up in bolts about 50 yards long and 1 yard wide. We sell any quantity at the prices below.

To apply muslin to the ceiling or walls, sew the number of lengths required to cover the space into one piece, leaving a margin of one inch on each breadth. Draw each breadth tightly and tack down the margin. By this method all the tacks will be covered by the muslin, except around the outside edges.

Per yd.

No. 1. A fine quality, for best work.....\$0.12

Without cover, 2-quart.	.40

### The "Practical" Paint Brush Suspender.

The frame is made in two sizes, and is detachable, simply resting across the edge of the bucket and, of course, can be removed when not in use. The spring coils will hold the handle of any ordinary paint brush, no matter what its size or shape. The suspender is made of the best steel and will last a lifetime. Painters who use it save both time and money.

No. 1 9 inches in length.	each, \$0.40
No. 2 18 inches in length.	each, 0.60

### Brush Wiper.

Can be used on any paint pail. Ought to be in the hands of every first-class painter and decorator. Don't wipe your brush on the edge of pail and stain floor. You can have your paint pails clean if you will use this wiper. It will also serve as a brush rest made entirely of steel and will last a life time.

Price	Each, \$0.40
-------	--------------

### Paint Sanders.

	Each.
Hinged front.	\$0.90
Hollow handle.	.80
Fantail handle bellows, 8 inch.	2.50

## Standard Paste Bucket.

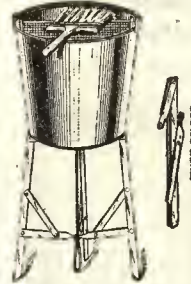

This device avoids stooping and all uncleanness by dirty brush handle or slopping on the floor.

The brush rest is as a colander. Any brush can be used, top makes nice wipe for same.

The buckets are extra quality, the flange at the bottom making them more durable than any other pail.

The standards are light and strong—will last a lifetime and when closed take no more space than a pair of shears. To attach to bucket open out flange, as in cut, standard holding firm in position or detached in an instant.

Price complete (Bucket and Standard)	Each, \$3.00
Extra Buckets, same as in cut.	" 1.50
Extra Standards	" 1.50

## 14 qt. Kalsomine Buckets.

Galvanized Iron	Per dozen, \$5.50
Each	.50

## 12 qt. Wooden Buckets.

3-Hoop	Per dozen, \$4.00
Each	.36

## Paste Strainer.

Unattached.

In Place on Bucket.

Is a valuable addition to a paper hangers' outfit, no lumps or other foreign matter can pass through it into the pail, saves much time and annoyance and gives better results, when the lengths of paper are being pasted and hung.

Each	\$0.80
------	--------

## White Enamelled Letters.

### Porcelain.

These goods are so well known (as the best sign letters ever invented), as to hardly need description. They are made of the finest hard enamel on copper plates; the shape and finish make them easy to put on and quickly cleaned. They are more legible than any other letter, and will never wear out, while the under-noted special prices make the first cost much lower than anything else that can be used for this purpose. Letters can be taken down and removed at any time.

### Wide Block.

This is the style most used.

	Each.	Each.
1-inch	\$0.04	6-inch \$0.18
2-inch	.06	7-inch .35
3-inch	.09	8-inch .50
4-inch	.12	10-inch 1.00
5-inch	.15	12-inch 1.50

Numbers cost same as letters. Complete stock always on hand.

## Cement for Enamelled Letters.

Price per lb., in tin boxes	\$0.30
-----------------------------	--------

Directions for making cement: Mix best dry white lead and coach varnish to the consistency of soft putty and tint with Indian red.

### Henry Bosch Company's Improved Transfer Graining Paper.

**Works Like a Charm.**

**A Wonderful Process.**

**Always Reliable and is in Itself a Complete  
Graining Outfit.**

This new process meets with unqualified approval wherever once used. It has many advantages over handgraining, and far excels all other devices that have been introduced for this purpose. It does much finer work and in one-third of the time taken for hand graining. It perfectly transfers the graining from the paper to the object to be grained, then the paper is discarded.

#### We Carry in Stock

Eighteen different shades, panels and growths of light or medium oak.

Six of antique oak, five of walnut, three of maple.

Two each of ash, cherry and mahogany and one each of pine, pitch pine and rosewood.

Finish your grounds the same as for hand work, only use more turps. Make colors dry flat, give the grained surface a thin coat of oil before varnishing and you will have no trouble. Full descriptive list and instructions mailed upon application.

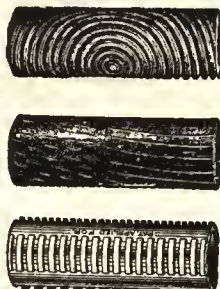

Price per double roll of 18 yards long and 26 in. wide.....\$1.50

#### Stencil Papers.

	Per 10 yd. roll	Per Yard
Prepared, ready for use, 48 in wide XX.....	\$3.00	\$0.36
Unprepared paper, 36 " XX.....	1.50	.20

These stencil papers are the same quality of stock as used in our stencils. The prepared being treated by same process for toughening.

### Davis Patent Grainer with Improve- ments.

The illustrations shown give an idea of what can be done with these graining tools.

The most inexperienced can produce better graining with it than is usually done by grainers, and in a short time, by practice with the tools, can do a job of graining that no one could imitate by hand.

We claim that its possessor is above competition of any one in his locality who is not so fortunate—no matter how skilled he may be.

A set of Grainers consists of three rolls, made of the best rubber, 5 inches long and 1½ inches in diameter. The corrugated roll imitates any known growth of wood. The other vein roller reproduces quarter sawed oak grain. The roller comb, with three different sizes of combs is especially valuable as an adjunct to the veining rollers to be used in connection with them in the graining of plain woods, as in stiles and rails. Therefore, one will be prepared to do any kind of oak, ash, chestnut, etc., graining without the use of any other tools.

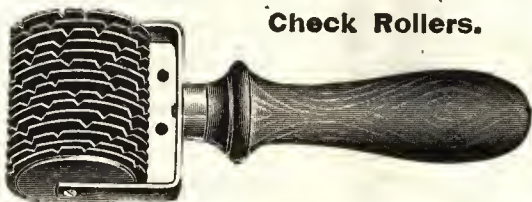

The Up-to-Date Grainer, a valuable treatise on graining, with full directions, is furnished free with every set.

Per set of 3 Rollers as shown in cut.....\$3.00

Extra Rollers corrugated only for wide and narrow panels.

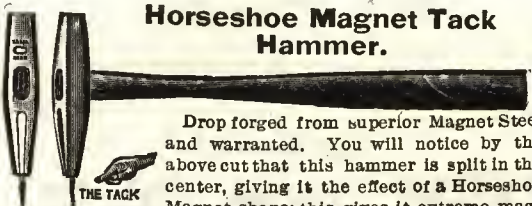

8 inches long, 1½ inches diameter. Each.....\$2.00

3 " " 1½ " " ..... 1.00

**Check Rollers.**

Each .....\$ 1.20  
Per dozen..... 12.00

**Horseshoe Magnet Tack  
Hammer.**

Drop forged from superior Magnet Steel and warranted. You will notice by the above cut that this hammer is split in the center, giving it the effect of a Horseshoe Magnet shape; this gives it extreme magnetic power. This hammer is especially adapted for tacking up blue plaster board, cheese cloth cards, posters, etc., and is far superior to any other tool made for this purpose.

Head bright finish, 4 oz. head, 12 inch handle.

No. 412. Each .....\$ 1.00

Per dozen..... 11.00

**For terms and other information see page 3.**

## The Ridgely Flexible Grainer.

A set of Ridgely Flexible Grainers will produce perfect imitations of all grained woods in less time than has ever before been possible.

With the Flexible Grainer heart work or quartered oak can be produced just as readily as straight grain.

Thousands of these implements have been sold to expert grainers and that is a strong endorsement of their time saving qualities.

No technical skill whatever is required; the novice can produce just as good results as the man who has spent a lifetime in learning the art of hand graining.

A small booklet accompanies each set, giving explicit instructions for preparing the ground coat, the colors required for various woods and how to obtain them.

Preparation of graining colors and best methods of applying same, also a detailed description of the graining tools, their capabilities and the proper methods of handling each.

Carefully read the contents of this booklet—it may be mastered within the hour—and an actual practice of even less time should make you reasonably proficient; ready, in fact, to put the "Grainer" into active and money-making operation.

Using this grainer only, there are many men devoting themselves to graining exclusively and earning from \$12 to \$20 per day.

The set consists of five tools: No. 1—Three-inch, No. 2—Five-inch, No. 3—Three-inch, No. 4—Five-inch, No. 5—Three-inch.

Nos. 1 and 2 are used for producing large effects, such as Walnut and Mahogany.

Nos. 3 and 4 produce open and heart grains.

No. 5 produces Quartered Oak grain and has attached to it the Comb or Blender.

Use this Comb or Blender upon all work done with any of the other tools.

Per Set.....\$4.50

How large the interest on a promissory note looks when you are paying it, and how small it looks when you are receiving it.

**"VULCANITE" RUBBER ROOFING.**

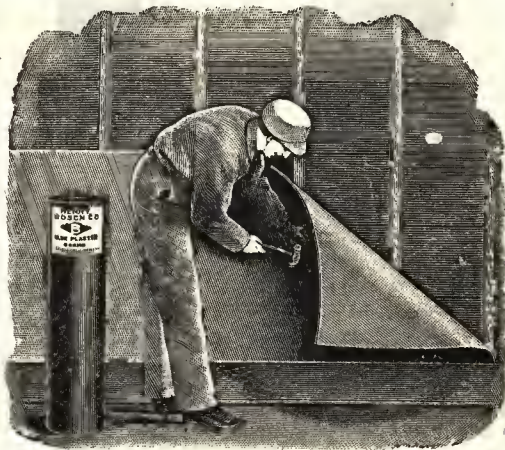

Is Adapted for Use on all Classes of Buildings, Flat or Steep Roofs.

We beg to draw your attention to the low price of our "Vulcanite" Roofing as compared with shingle or tin roofs.

Shingle roofs cost about \$6.00 per square, work completed. "Vulcanite" costs about \$4.00 per square, work completed. The quality of shingles is decreasing and the price increasing; this is owing to the fact that the great forests of America, from which the shingles are obtained, are fast disappearing. Tin roofs cost about \$7.00 per square, besides the cost and trouble of painting yearly. As to durability, good tin, if kept well painted, will last many years, but the new processes of manufacture have cheapened the quality as well as the price. "Vulcanite" is extremely durable. Not affected by heat or cold. Impregnated and coated with superior damp-proof materials which cannot evaporate. Does not absorb moisture. It cannot, therefore, be affected by the action of frost, and preserves a close and even surface. Made from the finest grade of wool felt. Guaranteed to contain no Coal Tar. Will not dry out or oxidize. Weatherproof, rot-proof, fire-proof. Can be painted any color. Requires no annual painting. Ready for use to meet the various demands of a good, permanent roofing at a moderate cost.

Is put up in rolls containing 108 square feet, 40 feet 6 inches long and 32 inches wide, with sufficient nails and cement for laying, either put in the core of the roll or in any size package required. Directions for use are placed inside each roll. Sample on request. Price includes nails and cement for laying.

Price per roll.....\$4.00

**Blue Plaster Board.**

Used in place of plaster for walls, ceiling and wainscoting. Can be used over boards or fastened to studding, making a neat and durable finish. Can be painted or varnished, or wall paper may be pasted over it. Strong and durable and warmer than plaster. For sheathing and insulating this is the best that is manufactured.

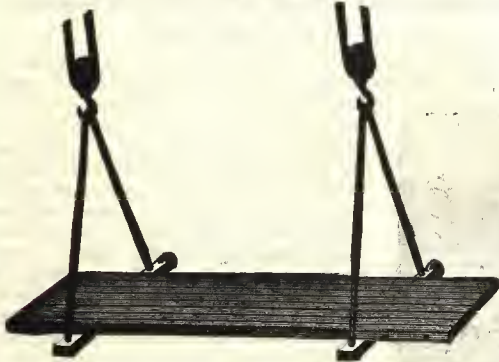

Rolls 36 inches wide containing 250 square feet, per roll...\$2.30

Rolls 36 inches wide containing 500 square feet, per roll...4.50

**NOTICE: DO NOT SEND PERSONAL CHECKS. REMIT BY POSTAL OR EXPRESS MONEY ORDER OR DRAFT ON NEW YORK OR CHICAGO.**

## Swinging Scaffolds.

Sides and Slates made of clear Norway pine with hickory rungs, put together with heavy screws and made strong and safe in every respect.

Lengths 6 to 24 feet, per foot	\$0.40

## Roof Bracket or Safety Stage Support.

The Roof Bracket or Safety Stage Support, here illustrated, will explain an improvement that is of interest to house painters, sign writers, carpenters, masons, or anyone doing work on roofs, and will at once commend itself to all painters and contractors as a much needed, reliable and perfect appliance for all kinds of work on shingled roofs.

These brackets are in every way a safety stage support and can be used with greater facility and more absolute security than by any other methods heretofore in use.

## The Bracket.

This bracket has a shoe made of malleable steel casting, in which rests the point of the scaffold hook or stage hook which carries the block and tackle for the staging.

This bracket is the only tool that the painter needs for working on any kind of a shingled roof, doing away with ladder hooks, paint pot holders, stage supports, nailing on cleats, etc., one simple tool covering all of the painter's needs on the roof.

If you wish to stand a ladder on a roof, place a couple of brackets where you want the ladder and set it on them.

Price per Set of Six ..... set, \$7.80  
Single Bracket ..... each, 1.50

## Painters' Trestles.

Made of clear Norway pine, with hickory rungs let into sides and secured by long heavy nails. The Trestles are put together at the head with wrought iron screw bolts. At the bottom both sides of each jack is securely braced with iron rods that join a circle, thus doing away with the old trouble of shaky trestles and making them the most durable Trestles in the market.

6 ft. long	per pair, \$ 7.00
7 " "	" 7.50

## Superior Extension Ladder.

Orders for Extension Ladders Cannot be Shipped Until Three Days After Receiving the Order.

Made from selected and seasoned Norway pine, and hickory rungs. Our new double roller, single piece top iron is much stronger than two single rollers and strengthens the ladder at its weakest place. Our hooks are also the best. This is the best extension ladder manufactured.

Per foot.

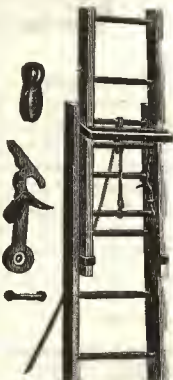

In two sections, 20 to 40 feet.....\$0.26  
In three sections, 20 to 60 feet. . .30

## Rope Extension Ladder.

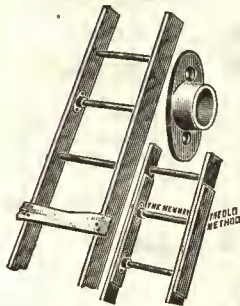

The top section of this ladder is raised and lowered by a rope passing through pulleys and around an iron crank, and operates very easily. Has self-locking hooks for locking top section, automatic in their action. The construction of ladder is same as our regular extension ladders.

Per foot.

Length, 20 to 52 feet.....\$0.40

## Rapid Ladder Rung Replacer.

A device manufactured from Cold Rolled Steel for replacing broken rungs in ladders. It is the only invention ever placed on the market for this purpose.

It is an absolute necessity in repairing an extension ladder. Should the rung or the side pieces on an extension become broken all that is necessary is to nail or screw an inch strip on inside of upright, then screw on rung replacer as shown in cut and extension ladder will work up or down, same as a new ladder.

Each.....\$0.16  
Per Dozen..... 1.20

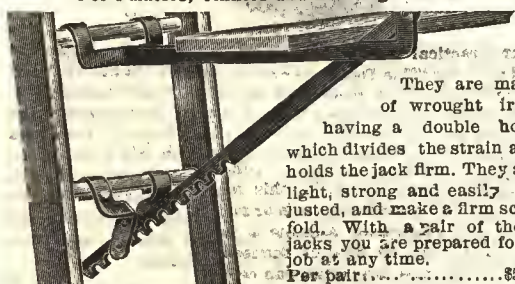

## Ladder Rungs.

Ladder Rungs made of Selected Hard Wood, sizes 14, 16, 18, 22 and 24 inches.

Each.....\$0.10

## Ladder Jack and Scaffold Support.

For Painters, Tinner and Building Trades.

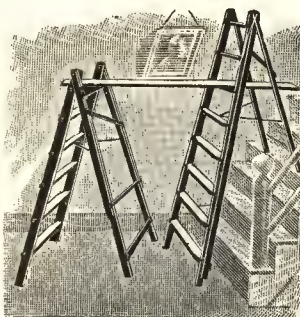

They are made of wrought iron, having a double hook which divides the strain and holds the jack firm. They are light, strong and easily adjusted, and make a firm scaffold. With a pair of these jacks you are prepared for a job at any time.

Per pair.....\$5.00

## The Willard Ladder.

Is the Best Painters Ladder Made.

This Step Ladder has no equal for strength and durability, and is very light in weight. No piece of wood joins another without being securely ironed thereto. Each step is securely ironed, and iron rods passes through from side to side forming a truss under each step. A 12-inch plank placed on any step two-thirds the way down will

pass between the braces on the legs as clear as through the ordinary trestles. Made also with permanent stair attachment as shown in cut.

Length 5 ft.....	\$2.30	Length 8 ft.....	\$3.70
" 6 ft.....	2.70	" 10 ft.....	4.60
" 7 ft.....	3.20	" 12 ft.....	5.50

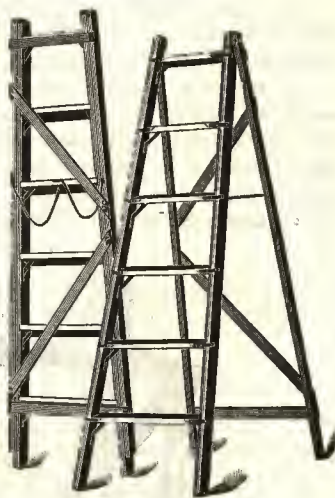

Any of the above sizes with stairway attachment, \$1.00 extra

## Painters' Favorite

One of the Best Painters' Ladders Made.

Strong and well built, can be used for trestles. Has iron straps on sides and front of each step; iron braces on sides and back of each step; corner irons on braces and legs; is made of extra heavy stock and can be folded compactly; is braced at every point.

5 feet.....	\$1.60

5 ft.....	1.90	10 ft.....	3.80
6 ft.....	2.30	12 ft.....	4.20

Extra for shelf.....\$0.20

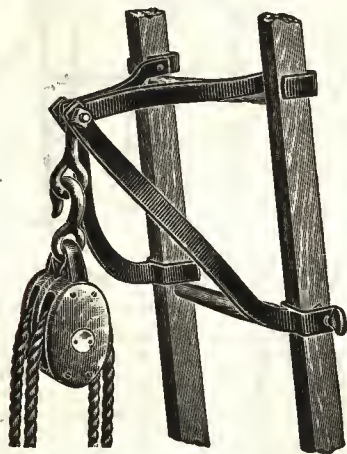

## Swinging Scaffold, Ladder Bracket.

Nearly every day some new feature in trade appliances is offered that demands the attention of practical men, the improvement here shown is one that will be readily appreciated.

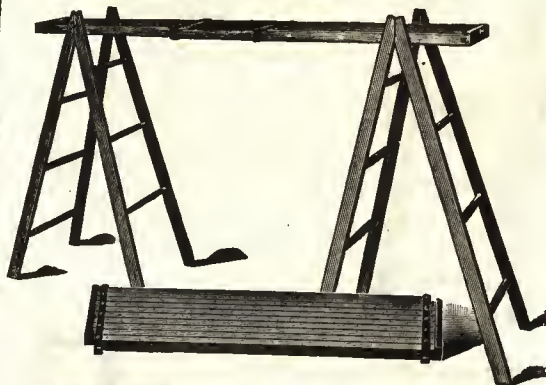

The engraving at top of this column shows Scaffold, Ladder and Brackets in actual use. The lower engraving shows the merit points of the ladder brackets. It is made entirely of wrought iron. Does not depend on the ladder rungs. Instantly adjusted on the side rails. Immovably fastened with the thumb screws. The whole strength of the side rails

of the ladder are its support in every case. More easily adjusted for cornice, gable or wall work than any other bracket on the market. By using more ladders and more brackets any length of building can be finished at one stretch. This bracket is rapidly coming into favor and has the commendation of all who have purchased it, as a time saver and an easily handled appliance.

Price, per pair.....\$3.00

## Universal Extension Plank

Every artisan who has had experience with staging will appreciate the great merit of this invention; the advantages may be summed up as follows:

Can be adjusted to fit any space. Does not spring. Will not warp. Always lies even. Affords a firm footing. Lighter than a plank of equal size. Very strong and durable. Can be carried up any stairway.

Made of finely selected southern pine, strongly ironed, well riveted and thoroughly inspected. 12 inches wide.

No. 1.	6 ft. closed, 10½ ft. extended, 11½ in. wide, each..	\$ 6.00
No. 2.	8 " " 13½ " " 11½ " " ..	7.50
No. 3.	10 " " 17½ " " 11½ " " ..	11.00

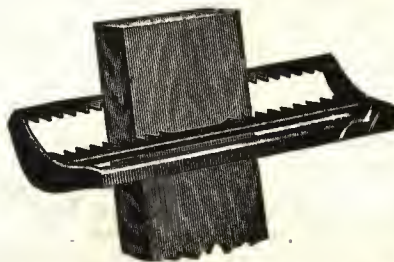

Adjustable  
Safety  
Hook.

The cut shows how readily and securely this hook can be fastened to the ladder. When the point is dropped over the ridge board you can with safety reach any part of the roof, corner or chimneys where work is to be done.

Price.....each, \$1.20

## The Dennis Plank Support.

Any practical man will see at a glance the advantage gained by using "The Dennis Plank Support" as shown in the accompanying cut. Extension ladders are not necessary to paper and calcimine a stairway. Place in each corner of the room on a short plank or board a Plank Support, then lay a plank from one Plank support to another on two sides of the room parallel with the walls, this forming stringers upon which to support a platform; one or more planks laid on the stringers at right angles forming a platform complete and capable of holding up several thousand pounds, and from which the four walls and ceiling can be reached.

Price, each, malleable iron.....\$1.25

For terms and other information see page 8.

## Our Brush Department

ON this and the following page, we show a few lines under the brand of H. B. Co.'s Best. Only the highest grades of Russia and Chinese Bristles are used in the manufacture of these lines; they are all extra heavy, and finely finished. Our general line of Brushes for the season of 1906, has been greatly improved by the addition of some new and desirable styles and a reduction in price of some of our Best Grades—buying as we do, in the largest quantities. We buy on closer margins than other dealers; this enables us to sell at cheaper prices. Our Brushes are selected with great care. We buy and sell only the Best. All **Our Brushes** are warranted, and we will cheerfully **Make Good** any that may fail or come to pieces by any fault of the maker.

# THE MASTER PAINTER

A. ASHMUN KELLY, Editor and Publisher

MALVERN (near Philadelphia) PENNA.

ISSUED EVERY MONTH - SUBSCRIPTION, ONE DOLLAR A YEAR

The MASTER PAINTER is the most widely quoted painting trade journal published, and there's a reason. In it you get the best there is for the progressive painter and decorator; it treats every phase of the trades it represents in a practical and concise manner; its editor and publisher is a painter of many years' experience, and you get the benefit of his life-long experience as a painter, writer and investigator. Can you afford to keep the dollar and not try the MASTER PAINTER for at least one year? SEND 10c FOR SAMPLE COPY.

Address

## THE MALVERN SCHOOL OF PAINTING

MALVERN, PENNA.

Director, PROF. A. ASHMUN KELLY, (Late of Winona Technical Institute, Indianapolis, Ind.)

## GUARANTEE

We guarantee that our Kalsomine will cover more surface and do a better job than any of the so called "Wall Finishes," and that our package  $3\frac{1}{2}$  inches deep,  $4\frac{7}{8}$  inches wide, 8 inches high, containing  $136\frac{1}{2}$  cubic inches, is the LARGEST and BEST shelf package of Kalsomine on the market.

## HYGIENIC KALSOMINE CO.

### Twelve Reasons Why it is Better than any Wall Finish in the Market

1. It is ten times whiter than Whiting or other preparations.
2. 100 pounds of Hygienic Kalsomine will cover as much surface as 400 pounds of Whiting and Glue, or 300 pounds of other prepared Kalsomine.
3. It contains no Whiting, Gypsum, Plaster of Paris, or any foreign material of that nature.
4. It is prepared by simply adding hot water, as it contains sufficient glue to prevent it from rubbing off, and at the same time will wash off easily when necessary.
5. It will not show laps or brush marks.
6. It makes a smooth and velvety finish.
7. It is made in white and all tints.

8. It can be kept after mixing any length of time and will never get rancid.
9. It requires no straining, and is the only prepared Wall Finish that practical painters approve and use.
10. It has been adopted by the large contracting painters of Chicago, who claim they can save by its use from one-fourth to one-third the time in covering a given surface than by us using Whiting or other so-called Wall Finishes.
11. The Board of Education of Chicago, after thorough tests in 1893 have adopted its use, and the public schools are Kalsomined with it.
12. For hospitals it is the best, as it is so fine that the germs of disease cannot enter the wall.
